Product Overview

Mini-Circuits' BLKD-183-S+ is a coaxial inner-outer DC Block supporting a wide range of applications from 10 MHz to 18 GHz including Ku band test and measurement and more. This model provides low insertion loss, excellent return loss and DC voltage handling up to 200V. The unit features SMA-Female connector at one end and SMA-Male connector at the other end and comes housed in a rugged stainless steel body, measuring only 0.5" in diameter and 1.3" in length.

Key Features

Features	Advantages
Wideband, 10 MHz to 18 GHz	Wide frequency range up to 18 GHz provides application flexibility and makes this model ideal for broad- band and multi-band use.
Inner-Outer DC Block	Blocks DC current flow at the inner and outer conductor
Excellent Return Loss, 20 dB typ at 8 GHz	Provides good matching for 50Ω systems and minimizes signal reflections across wide frequency range enabling its use in test and measurement.
Low insertion loss, 0.43 dB typ.	Provides excellent signal power transmission from input to output.
Stainless steel construction.	Stands up to wear and tear in demanding test environments and provides excellent reliability.
Very wide operating temperature range, -65 to +125˚C	Withstands extreme operating conditions and is suitable for use near high power components where heat rise is common and for use in over temperature tests
