

Millimeter Wave Precision

Fixed Attenuator Die

KAT-D-Series

50Ω Up to 2W DC to 50 GHz

The Big Deal

- Ultra-wide band, DC to 50 GHz
- Excellent power handling, up to 2W
- Contiguous ground plane for easy installation

Product Overview

Mini-Circuits' KAT-D-series MMIC attenuator dice (RoHS compliant) are fixed value, absorptive attenuators fabricated using highly repetitive MMIC processing with thin film resistors on GaAs substrates. Providing precise attenuation from DC up to 50 GHz, these attenuators are ideal for a very wide range of applications up to millimeter wave bands including 5G systems and more. KAT-D-series attenuator dice are available from stock with nominal attenuation values of 0 to 10 dB (in 1 dB steps), and 12, 15, 20, and 30 dB.

Key Features

| Feature | Advantages |
|---|---|
| Ultra-wide band operation, DC to 50 GHz | KAT-D-series attenuator dice support a wide array of applications including 5G systems, microwave communications, satellite, defense and aerospace, medical broadband and optical applications |
| Single, contiguous ground plane | The attenuators achieve ultra-wide band performance up to 50 GHz with single, contiguous ground plane, simplifying installation into customer hybrids. |
| High power handling, up to 2W | Power handling up to 2W makes KAT attenuator dice suitable for a wide range of system power requirements. |
| Wide range of nominal attenuation values: 0 to 10 dB (in 1 dB steps) and 12, 15, 20 and 30 dB | Small increment offerings enable circuit designers to change attenuation values without motherboard redesign, making the KAT-D-series ideal for adjusting attenuation values based on test results. |
| Excellent attenuation flatness | Provides precise, consistent attenuation across the entire frequency band, ideal for broadband and multi-band usage. |

Millimeter Wave Precision

Fixed Attenuator Die

KAT-12-D+

50Ω 1.1W 12dB DC to 50 GHz

Product Features

- Wide bandwidth, DC to 50 GHz
- Excellent attenuation accuracy & flatness
- Exceptional power handling, up to 1.1W

+RoHS Compliant
The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

Ordering Information: Refer to Last Page

Typical Applications

- Cellular
- PCS
- Communications
- Radar
- Defense
- 5G

General Description

KAT-12-D+ is an absorptive attenuator Die fabricated using highly repetitive MMIC process including thin film resistors on GaAs substrate. KAT-12-D+ attenuator Die contains through-wafer vias to realize low thermal resistance and wideband operation.

Simplified Schematic

| Pad # | Description |
|------------|-------------|
| 2 | RF-IN |
| 5 | RF-OUT |
| 1,3,4,6 | Ground |
| Die bottom | Ground |

Note: 1. Bond Pad material - Gold
2. Bottom of Die - Gold plated

Bonding Pad Position / Description

Die dimensions in μm

| L1 | L2 | L3 | L4 | H1 | H2 | H3 | Thickness | Bond pad size |
|-----|-----|-----|-----|----|-----|-----|-----------|---------------|
| 125 | 375 | 625 | 750 | 85 | 615 | 700 | 100 | 125 x 100 |

(Numbers on bond pads are for identification only, not marked on Die)

Electrical Specifications at 25°C, 50Ω

| Parameter | Condition (GHz) | Die Typ. ¹ | Die Eval Board Typ. ² | Unit |
|---|-----------------|-----------------------|----------------------------------|------|
| Frequency Range | | DC-50 | DC-50 | GHz |
| Attenuation | DC-5 | 12.0 ± 0.1 | 12.2 ± 0.2 | dB |
| | 5-15 | 12.0 ± 0.1 | 12.4 ± 0.2 | |
| | 15-18 | 12.0 ± 0.1 | 12.6 ± 0.2 | |
| | 18-26.5 | 12.0 ± 0.2 | 12.9 ± 0.2 | |
| | 26.5-43.5 | 11.8 ± 0.6 | 12.8 ± 0.4 | |
| | 43.5-50 | -- | 12.7 ± 0.2 | |
| VSWR | DC-5 | 1.2 | 1.1 | :1 |
| | 5-15 | 1.2 | 1.1 | |
| | 15-18 | 1.2 | 1.4 | |
| | 18-26.5 | 1.2 | 1.5 | |
| | 26.5-43.5 | 1.2 | 1.3 | |
| | 43.5-50 | -- | 1.3 | |
| Operating Input Power at ³ : | 25°C | DC-50 | 1.1 | W |
| | 85°C | DC-50 | 0.8 | W |

1. Electrical specifications are typical measured characteristics on die using MPI Titan Series 250 μm pitch GSG probe.
2. Measured on X-Microwave Drop-In / Evaluation Block, XM-B1A8-0204D
3. Tested in industry standard 2x2 mm, 6-lead MCLP package.

Absolute Maximum Ratings

| | |
|--------------------------------|---------------|
| Operating Temperature (ground) | -40°C to 85°C |
| RF Input Power | 1.1W |

Permanent damage may occur if any of these limits are exceeded.

Assembly Diagram

(Ground Bond Wires are optional)

X-Microwave Drop-In / Evaluation Block

Assembly and Handling Procedure

1. Storage
Dice should be stored in a dry nitrogen purged desiccators or equivalent.
2. ESD
MMIC GaAs Attenuator dice are susceptible to electrostatic and mechanical damage. Die are supplied in antistatic protected material, which should be opened in clean room conditions at an appropriately grounded anti-static workstation. Devices need careful handling using correctly designed collets, vacuum pickup tips or sharp antistatic tweezers to deter ESD damage to dice.
3. Die Attach
The die mounting surface must be clean and flat. Using conductive silver filled epoxy, recommended epoxies are DieMat DM6030HK-PT/H579 or Ablestik 84-1LMISR4. Apply sufficient epoxy to meet required epoxy bond line thickness, epoxy fillet height and epoxy coverage around total die periphery. Parts shall be cured in a nitrogen filled atmosphere per manufacturer's cure condition. It is recommended to use antistatic die pick up tools only.
4. Wire Bonding
Bond pad openings in the surface passivation above the bond pads are provided to allow wire bonding to the dice gold bond pads. Thermosonic bonding is used with minimized ultrasonic content. Bond force, time, ultrasonic power and temperature are all critical parameters. Suggested wire is pure gold, 1 mil diameter. Bonds must be made from the bond pads on the die to the package or substrate. All bond wires should be kept as short as low as reasonable to minimize performance degradation due to undesirable series inductance.

*Known Good Dice ("KGD") means that the dice are taken from PCM good wafer and then visually inspected per Mini-Circuits' criteria. Though this is not definitive, it does provide a higher degree of confidence that the dice are capable of meeting typical RF electrical parameters specified by Mini-Circuits.

ESD Rating**

Human Body Model (HBM): Class 2 (Pass 2000V) in accordance with ANSI/ESD STM5.1-2001

** Tested in industry standard 2x2 mm, 6-lead MCLP package.

Additional Notes

- Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
- Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
- The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp
- Mini-Circuits does not warrant the accuracy or completeness of the information, text, graphics and other items contained within this document and same are provided as an accommodation and on an "As is" basis, with all faults.
- Purchasers of this part are solely responsible for proper storing, handling, assembly and processing of Known Good Dice (including, without limitation, proper ESD preventative measures, die preparation, die attach, wire bonding and related assembly and test activities), and Mini-Circuits assumes no responsibility therefor or for environmental effects on Known Good Dice.
