PRODUCT OVERVIEW

K1-HAT-A+ is a designer's kit consisting of five different attenuator models in the HAT-A+ family. There is one unit per model for a total of five units. Mini-Circuits' HAT-A series are fixed attenuators operating from DC to 2000 MHz with excellent attenuation flatness. This attenuator series supports testing and measurement applications. Precise performance, excellent VSWR and rugged unibody construction make these models an ideal solution for systems requiring precise attenuation.
