

Surface Mount High Pass Filter

SXHP-5+

50Ω 5 to 400 MHz

The Big Deal

- Low insertion loss
- High rejection
- Miniature shielded package

CASE STYLE: HF1139

Product Overview

SXHP-5+ is a 50Ω high pass filter fabricated using SMT technology. This high pass filter covers from 5-400 MHz. This filter is built with high Q capacitors and wire wound inductors for superior performance. It has repeatable performance across lots and consistent performance across temperature.

Key Features

Feature	Advantages
Low insertion loss	Can be used in high performance applications.
Good rejection	This enables the filter to attenuate spurious signals and reject harmonics for broad band frequency band.
Small size, 0.44" X 0.74" X 0.27"	The small surface mount package enables the SXHP-5+ to used in compact design.

Notes

- A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein.
