# Microwave Precision **Fixed Attenuator**

## **YAT-SERIES**

Up to 2W DC to 18 GHz

## The Big Deal

- Exceptional Power Handling, Up to 2W
- Wide bandwidth, DC 18 GHz
- Small Size, 2 mm x 2 mm

CASE STYLE: MC1630

## **Product Overview**

YAT attenuators (ROHS compliant) are fixed value, absorptive attenuators fabricated using highly repetitive MMIC processing including thin film resistors on Silicon substrates. YAT attenuator die contain throughwafer Cu metallization vias to realize low thermal resistance and wideband operation. YATs are available with nominal attenuation values of 0 to 10 dB (in 1 dB steps), and 12, 15, 20, and 30 dB. Packaged in tiny 2 mm x 2 mm MCLP<sup>TM</sup> package fits into tiny spaces.

## **Key Features**

| Feature  | Advantages   |
|--|--|
| Wideband operation, DC to 18 GHz   | Supports a wide array of applications including wireless cellular, microwave communications, satellite, defense and aerospace, medical broadband and optic applications. |
| Small Size and simple to use (2 mm x 2 mm)   | As a single chip solution, the YAT series occupies less board space than a "T" or "Pi" pad configuration, and ensures repeatable performance over wide frequency ranges. |
| High Power, Up to 2W   | High power handling in a small size package.   |
| Wide range of nominal attenuation values 0 to 10 dB (in 1 dB steps), and 12, 15, 20, and 30 dB | Small increment offering enables circuit designer to change attenuation values without motherboard redesign making the YAT series ideal for select at test application.  |
| MCLP™ Package  | Low Inductance, repeatable transitions, excellent thermal path make the YAT series an ideal solution as an alternative to "do it yourself" resistor based attenuators.   |

Notes
A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuit standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.ninicircuits.com/MCLStore/terms.jsp

50Q **2W** 5dB DC to 18 GHz

#### **Product Features**

- miniature package MCLP™ 2 x 2 mm
- wide bandwidth, DC-18 GHz
- excellent attenuation accuracy & flatness

CASE STYLE: MC1630

+RoHS Compliant

The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

#### **Typical Applications**

- Cellular
- PCS
- communications
- radar
- defense

### **General Description**

YAT-5+ is a 5-dB absorptive attenuator fabricated using highly repetitive MMIC process including thin film resistors on GaAs substrate. YAT-5+ attenuator die contains through-wafer Cu metallization vias to realize low thermal resistance and wideband operation. Packaged in tiny 2 mm x 2 mm MCLP<sup>TM</sup> package fits into tiny spaces.

#### **Pad Description**

| Function | Pad Number                    | Description                    |
|----------|-------------------------------|--------------------------------|
| RF IN    | 2                             | RF input pad                   |
| RF-OUT   | 5                             | RF output pad                  |
| GND      | 1,3,4,6<br>Bottom Exposed pad | Connected to ground externally |

### Electrical Specifications<sup>1</sup> at 25°C, 50Ω (CPW)

| Parameter                | Condition (GHz) | Min. | Тур. | Max. | Unit |
|--------------------------|-----------------|------|------|------|------|
| Frequency Range          |                 | DC   | _    | 18   | GHz  |
|                          | 0.01            | _    | 5    | _    |      |
|                          |                 |      |      |      |      |
| Attenuation              | DC - 5          | 4.7  | 5.0  | 5.3  | dB   |
|                          | 5 - 15          | 4.8  | 5.4  | 6.0  |      |
|                          | 15 - 18         | 5.0  | 5.5  | 6.1  |      |
|                          | DC - 5          | _    | 1.04 | 1.38 |      |
| VSWR                     | 5 - 15          | _    | 1.34 | 1.90 | :1   |
|                          | 15 - 18         | _    | 1.38 | 1.95 |      |
| Input Power <sup>2</sup> | DC - 18         | _    | _    | 2.0  | W    |

<sup>1.</sup> Tested on Mini-Circuits test board TB-621-5+ using coplanar wave guide (CPW) input and output traces (see suggested PCB layout on page 4 of this data sheet)

#### **Absolute Maximum Ratings**

|   | •              |  |  |
|---|----------------|--|--|
| Operating Case Temperature <sup>3</sup> | -40°C to 85°C  |  |  |
| Storage Temperature                     | -65°C to 150°C |  |  |
| RF Input Power                          | 2W             |  |  |

<sup>3.</sup> Case is defined as ground lead.

Permanent damage may occur if any of these limits are exceeded.

#### **Characterization Test Circuit**

Fig 1. Block diagram of Test Circuit used for characterization, Test board TB-621-5+ Conditions: Attenuation, VSWR: Pin=-10 dBm

### Typical Performance Data at 25°C

| Frequency<br>(GHz) | Attenuation (dB) | VSWR<br>(:1) |
|--------------------|------------------|--------------|
| 0.01               | 5.02             | 1.00         |
| 1.0                | 5.06             | 1.04         |
| 2.0                | 5.07             | 1.03         |
| 5.0                | 5.14             | 1.13         |
| 8.0                | 5.27             | 1.26         |
| 10.0               | 5.50             | 1.26         |
| 12.0               | 5.80             | 1.49         |
| 15.0               | 5.60             | 1.49         |
| 16.0               | 5.50             | 1.45         |
| 18.0               | 5.50             | 1.22         |

<sup>2.</sup> RF Power at 25°C case temperature: 2.0 Watt. Derate linearly to 1.0 W at 85°C.
