

086SMRC Model Series

The Big Deal

- Hand Formable
- Tight Bend Radius
- Right Angle SMA Connectors, 180° rotated
- · Ideal for interconnect of assembled systems

Product Overview

The 086 Series Hand-Flex Coaxial Cables are ideal for interconnection of coaxial components or sub-systems. The construction includes a silver-plated copper-clad steel center conductor which maintains the shape after bending. The outer shield is copper braid, tin soaked, which minimizes signal leakage and at the same time flexible for easy bend. Dielectric is low loss PTFE. Connectors have passivated stainless-steel coupling nut over a gold plated connector body and gold plated, brass center conductor.

Key Features

| Feature | Advantages |
|---|--|
| Hand-Formable RF Cables | The 086 Series Hand-Flex cables are hand formable making them ideal for use integrating coaxial components and sub-assemblies without the need for special cable-bending tools and alleviating the risk of damage during the bending process typical of semi-rigid coaxial cable assemblies. |
| Tight Bend Radius | Capable of only 6mm bend radius, the 086 Hand Flex series is able to make connections in tight spaces making these cables ideal for dense system integration |
| Excellent Return loss | Supporting typical return loss of 33 dB to 6 GHz and 21 dB to 18 GHz, the 086 Series Hand-Flex Cables are ideally suited for interconnecting a wide variety of RF components while minimizing VSWR ripple contribution due to mating cables & connectors. |
| Good Power Handling Capability: • 211W at 0.5 GHz • 35W at 18 GHz | Mini-Circuits 086 Cable series can support medium to high RF power levels enabling these cables to be used in the transmit path. NOTE: power rating is at sea-level altitudes. |
| Built in Anti-torque nut | Mini-Circuits 086 Series Hand Flex cables include an anti-torque feature to support the connector body during installation alleviating risk of stress to the connector/cable interface. |
| Right angle SMA connectors | Avoids multiple right angle bends and improves reliability. |

Cable Construction

Features

- · Wideband frequency coverage, DC to 18 GHz
- Low Loss, 0.38 dB at 18 GHz
- Excellent Return Loss, 20 dB at 18 GHz · Hand formable to almost any custom shape without special bending tools
- · 6mm bend radius for tight installations
- · Anti-torque nut prevents cable stress during installation
- Insulated outer jacket standard¹
- Connector interface, meets MIL-STD-348 · Ideal for interconnect of assembled systems
- Applications
- Replacement for custom bent 0.086" semi-rigid cables Communication receivers and transmitters
- Military and aerospace system
- · Environmental and test chambers

Mini-Circuits Environmental Specifications ENV52

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

| Specification | Test/Inspection Condition | Reference/Spec |
|-----------------------|---|-----------------------------|
| Operating Temperature | -55° to 105° C or -55° to 85° C (see datasheet) Ambient Environment | Individual Model Data sheet |
| Storage Temperature | -55° to 105° C or -55° to 85° C (see data sheet) Ambient Environment | Individual Model Data Sheet |
| Thermal Shock | -55° to 100°C, 100 Cycles | MIL-STD-202F; Method 107G |
| Multiple Bend Radius | 40 mm, 5 times for 141 series cables 30 mm, 5 times for 086 series cables | |
| Single Bend Radius | 8 mm for 141 series cables 6 mm for 086 series cables | |
