PRODUCT OVERVIEW

The 141N Series Hand-Flex™ Coaxial Cables are ideal for interconnection of coaxial components or sub-systems. The construction includes an unjacketed silver-plated copper-clad center conductor which maintains the shape after bending. The outer shield is tin soaked, silver plated copper braid which minimizes signal leakage and at the same time flexible for easy bending. Connectors have passivated stainless-steel coupling nut over a gold plated connector body and gold plated, brass center conductor.
