

6FT DC to 3000 MHz F-Type Male

FEATURES

- RoHS compliant
- Wideband coverage, DC to 3000 MHz
- Extra rugged construction with strain relief for longer life
- Stainless steel F-Male connectors for long mating-cycle life
- Useful over temperature range, -55°C to +105°C
- Triple shield cable for excellent shielding effectiveness
- · Flexible for easy connection & bend radius
- · 6 month guarantee*

- High volume production test stations
- Research & development labs
- Environmental & temperature test chambers
- Replacement for OEM test port cables
- Field RF testing
- · Cellular infrastructure site testing

Model No.	CBL-6FM-75+
Case Style	ND1919-6
Connectors	F-Male

+RoHS Compliant

The +Suffix identifies RoHS Compliance. See our website for methodologies and qualifications

Product Guarantee*
Mini-Circuits* will repair or replace your test cable at its option if the connector attachment fails within \underline{six} months of shipment. This guarantee excludes cable or connector interface damage from misuse or abuse.

PRODUCT OVERVIEW

Mini-Circuits CBL-FM-75+ series 75Ω test cables provide extra rugged durability and flexibility for easy connections and long life in test environments. These cables support 75Ω test applications from DC to 3000 MHz and provide outstanding return loss and low insertion loss across their full frequency range with power handling up to 338W. They're performance qualified up to 20,000 flex cycles and feature triple-shielded cable construction with F-type (M) to F-type (M) connectors. Available in a variety of lengths.

KEY FEATURES

Feature	Advantages
Wideband, DC to 3000 MHz	Wide frequency range covers many applications.
High Power Handling: • 338W @ 0.5 GHz • 98W @ 3 GHz	High power handling makes CBL test cables suitable for applications with a wide range of requirements.
Excellent Return Loss and Low Insertion Loss	Well matched for 75Ω systems across the entire frequency band.
Extra rugged, triple shield cable construction	CBL-FM-75+ test cables provide outstanding durability, flexibility, and shielding effectiveness.
Passivated stainless steel N-Male connectors	Long connector mating cycle life.
Superior stability of Insertion Loss and Return Loss	Reliable performance in almost any test layout configuration.

Environmental Specifications

ENV34

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-55° to 105°C Ambient Environment	Individual Model Data Sheet
Storage Temperature	-55° to 105°C Ambient Environment	Individual Model Data Sheet
Thermal Shock	-55° to 105°C, 100 cycles	MIL-STD-202, Method 107, Condition A-3, except - 105°C
Mechanical Flexing	20,000 cycles During each cycle, cable flexed from 90° through 0° to -90° and back with a Radii of 3 inches
