

MMIC

# Directional Coupler Die

EDC21-24-D+

50Ω 21 dB 4 to 20 GHz

## The Big Deal

- Wideband, 4-20 GHz
- Excellent coupling flatness  $21 \pm 2$  dB typ.
- Highly repeatable performance (GaAs based design)

## Product Overview

Mini-Circuits' EDC21-24-D+ is a MMIC wideband 21 dB directional coupler die that operates from 4 to 20 GHz. It provides excellent coupling flatness over a broad bandwidth and good return loss. This coupler also provides a quadrature phase shift between the signal at the through port and coupler port. Manufacturing using GaAs Technology, this model results in relatively high repeatability in performance.

## Key Features

Feature	Advantages
Wideband, 4-20 GHz	EDC21-24-D+ can be used in many applications, saving component count. Also ideal for wideband applications such as military and instrumentation.
Excellent coupling flatness	Excellent coupling flatness minimizes need for external compensation to achieve flatness
Unpackaged Die	Enables user to integrate it directly into hybrids.

# MMIC Directional Coupler Die

## EDC21-24-D+

50Ω 21 dB 4 to 20 GHz

### Product Features

- Low mainline loss, 0.7 dB typ.
- Excellent coupling flatness,  $\pm 2$ dB
- Highly repeatable performance (GaAs based design)
- No external termination required

### Typical Applications

- Satellite communications
- Wireless infrastructure
- Test and measurements

#### +RoHS Compliant

The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

**Ordering Information: Refer to Last Page**

### General Description

Mini-Circuits' EDC21-24-D+ is a MMIC wideband 21 dB directional coupler die that operates from 4 to 20 GHz. It provides excellent coupling flatness over a broad bandwidth and good return loss. This coupler also provides a quadrature phase shift between the signal at the through port and coupler port. Manufacturing using GaAs Technology, this model results in relatively high repeatability in performance.

1. Measured on Mini-Circuits Characterization Test Board, TB-978+. Die packaged in 4x4 mm, 24-lead MCLP package.

**Maximum Ratings<sup>1,2</sup>**

Parameter	Ratings
Operating Temperature	-40°C to 85°C
Input Power	32.5 dBm (5 minute max.) 29.5 dBm (continuous)
Power at internal termination	15 dBm (5 minute max.) 12 dBm (continuous)

2. Permanent damage may occur if any of these limits are exceeded.

## Assembly Diagram

## Assembly and Handling Procedure

1. Storage  
Dice should be stored in a dry nitrogen purged desiccators or equivalent.
2. ESD  
MMIC dice are susceptible to electrostatic and mechanical damage. Die are supplied in antistatic protected material, which should be opened in clean room conditions at an appropriately grounded anti-static workstation. Devices need careful handling using correctly designed collets, vacuum pickup tips or sharp antistatic tweezers to deter ESD damage to dice.
3. Die Attach  
The Die mounting surface must be clean and flat. Using conductive silver filled epoxy, recommended epoxies are DieMat DM6030HK-PT/H579 or Ablestik 84-1LMISR4. Apply sufficient epoxy to meet required epoxy bond line thickness, epoxy fillet height and epoxy coverage around total Die periphery. Parts shall be cured in a nitrogen filled atmosphere per manufacturer's cure condition. It is recommended to use antistatic Die pick up tools only.
4. Wire Bonding  
Bond pad openings in the surface passivation above the bond pads are provided to allow wire bonding to the dice gold bond pads. Thermosonic bonding is used with minimized ultrasonic content. Bond force, time, ultrasonic power and temperature are all critical parameters. Suggested wire is pure gold, 1 mil diameter. Bonds must be made from the bond pads on the Die to the package or substrate. All bond wires should be kept as short as low as reasonable to minimize performance degradation due to undesirable series inductance.

Environmental Ratings	ENV-80

\*Known Good Dice ("KGD") means that the dice are taken from PCM good wafer and visually inspected in question have been subjected to Mini-Circuits while this is not definitive, it does help to provide a higher degree of confidence that dice are capable of meeting typical RF electrical parameters specified by Mini-Circuits.

## ESD Rating\*\*

Human Body Model (HBM): Class 1B (500V) in accordance with ANSI/ESD STM 5.1 - 2001

\*\* Tested in industry standard 4x4 mm, 24-lead MCLP package.

## Additional Notes

- Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
- Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
- The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at [www.minicircuits.com/MCLStore/terms.jsp](http://www.minicircuits.com/MCLStore/terms.jsp)
- Mini-Circuits does not warrant the accuracy or completeness of the information, text, graphics and other items contained within this document and same are provided as an accommodation and on an "As is" basis, with all faults.
- Purchasers of this part are solely responsible for proper storing, handling, assembly and processing of Known Good Dice (including, without limitation, proper ESD preventative measures, Die preparation, Die attach, wire bonding and related assembly and test activities), and Mini-Circuits assumes no responsibility therefor or for environmental effects on Known Good Dice.

## Typical Performance Curves

Note: Testdata of Die packaged in 4x4 mm, 24-lead MCLP package

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-40° to 85° C or -40° to 105° C or -55° to 105° C or -45° to 105° C Ambient Environment	Refer to Individual Model Data Sheet
Storage Environment (Die)	-65° to 150°C	Individual Model Data Sheet
Storage Environment(Packaging)	-40° to 70°C and 40 to 60% humidity (In Factory Shipped Package)
