## Config. D

## Features

- wideband, 0.1 to 400 MHz
- good return loss

## Applications

- impedance matching

## Transformer Electrical Specifications

| $\Omega$<br>RATIO<br>(Secondary/Primary) | FREQUENCY<br>(MHz) | INSERTION LOSS* |             |             |
|------------------------------------------|--------------------|-----------------|-------------|-------------|
|                                          |                    | 3 dB<br>MHz     | 2 dB<br>MHz | 1 dB<br>MHz |
| 1.5                                      | 0.1-400            | 0.1-400         | 0.5-200     | 1-100       |

\* Insertion Loss is referenced to mid-band loss, 0.3 dB typ.

## Typical Performance Data

| FREQUENCY<br>(MHz) | INSERTION<br>LOSS<br>(dB) | INPUT<br>R. LOSS<br>(dB) |
|--------------------|---------------------------|--------------------------|
| 0.10               | 1.79                      | 7.10                     |
| 0.61               | 0.65                      | 18.61                    |
| 1.27               | 0.55                      | 20.63                    |
| 5.03               | 0.35                      | 24.38                    |
| 10.86              | 0.33                      | 25.10                    |
| 22.53              | 0.35                      | 24.87                    |
| 49.60              | 0.39                      | 22.83                    |
| 149.65             | 0.58                      | 15.96                    |
| 201.16             | 0.61                      | 13.38                    |
| 400.00             | 1.67                      | 6.07                     |

## Notes

- A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.  
 B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuits' applicable established test performance criteria and measurement instructions.  
 C. The parts covered by this specification document are subject to Mini-Circuits' standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. Dimensions are in inches (mm). Tolerances: 2PL.  $\pm .03$ ; 3PL.  $\pm .015$

### Notes:

1. Case material: Aluminum alloy.
2. Case finish:  
For RoHS Case Styles: Clear chemical conversion coating, non-chrome or trivalent chrome based.
3. Mounting bracket available on request. Add suffix B to part number.
4. Bracket version, option B, dimension "C" changes from .75 to .94 inches when connectors are type N.
5. Refer to the individual model data sheet for the type of connectors available.

RF/IF MICROWAVE COMPONENTS

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

| Specification              | Test/Inspection Condition                                                              | Reference/Spec                       |
|----------------------------|----------------------------------------------------------------------------------------|--------------------------------------|
| Operating Temperature      | -55° to 100°C<br>Ambient Environment                                                   | Individual Model Data Sheet          |
| Storage Temperature        | -55° to 100° C<br>Ambient Environment                                                  | Individual Model Data Sheet          |
| Barometric Pressure        | 100,000 Feet                                                                           | MIL-STD-202, Method 105, Condition D |
| Humidity                   | 90% RH, 65°C<br>Units may require bake-out after humidity to restore full performance. | MIL-STD-202, Method 103              |
| Thermal Shock              | -65° to 125°C, 5 cycles                                                                | MIL-STD-202, Method 107, Condition B |
