Coaxial

High Power Amplifier

HPA-25W-63+

50Ω 25W 700 to 6000 MHz

The Big Deal

- High output power at saturation, 25W typ.
- High gain, 53 dB typ.
- Rugged 3U rack mount case style with internal fans
- Operates from AC line power: 85-264V
- Built-in over-temperature protection

CASE STYLE: NG1942

Product Overview

The HPA-25W-63+ is a high power, rack mount amplifier with a self-contained AC power supply which can be used for a wide variety of laboratory testing applications. This rugged amplifier is capable of amplifying signals up to 25W output power over its entire operating bandwidth of 700 – 6000 MHz. Built-in safety features include fans alarms and automatic shut down mechanism to prevent damage in the event of excessive internal temperatures. The amplifier's output stage is further protected in the event of a fault condition, allowing high power operation for up to 5 minutes into an open or short load (refer to the maximum input power specifications).

Key Features

Feature	Advantages
Wideband frequency range	700 – 6000 MHz bandwidth covers popular wireless communications, SATCOM and radar bands in a single instrument, useful for many test applications.
25W output power at saturation	Supports high power test applications such as EMI, max power handling, and reliability testing
High Gain	53 dB typical gain allows the HPA-25W-63+ to be driven to full output power with nearly all commercially available signal generators
High Reverse Isolation	Insulates load reflections to protect sensitive signal sources from potential damage and performance variation due to load pulling
A/C Power	Operating from standard AC line power supply - the HPA-25W-63+ can be powered from 85-264V at 47~63 Hz making this HPA versatile in supporting global markets
Cooling system	Front to back forced air cooling fans makes this ideal for usage in test equipment racks.
Built-in protections	The unit shuts OFF when the internal amplifier reaches a set temperature of 85±5°C, preventing damage to the amplifier and providing added reliability.
CE marked	Meets conformity standards for sale within the European Economic Area (EEA).

Additional Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp

Mini-Circuits

Environmental Specifications **ENV76**

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-0° to 50° C Ambient Environment	Individual Model Data Sheet
Storage Temperature	-20° to 70° C (non condensing)	Individual Model Data Sheet
