

Voltage Variable Attenuator **PVA-453-34-D+**50 Ω 10 to 45 GHz

THE BIG DEAL

- Ultra-Broadband, 10 to 45 GHz
- Wide Attenuation Range, Up to 51 dB Typ. at 30 GHz
- Excellent Return Loss for All Attenuation States
- Low Insertion Loss, 2 dB Typ.
- High IIP3 in All Attenuation States

APPLICATIONS

- 5G MIMO and Back Haul Radio Systems
- Satellite Communications
- Test and Measurement Equipment
- Radar, EW, and ECM Defense Systems

**+RoHS Compliant**

The +Suffix identifies RoHS Compliance.
See our website for methodologies and qualifications

SEE ORDERING INFORMATION ON THE LAST PAGE

PRODUCT OVERVIEW

The PVA-453-34-D+ is an absorptive voltage variable attenuator MMIC die fabricated using GaAs pHEMT technology. This VVA covers the frequency range of 10 to 45 GHz offering high dynamic range, low distortion, and low insertion loss. The wide attenuation range is developed from two attenuation stages in series, each using -4 V to 0 V analog control voltages, which can be controlled independently. This product is ideal for applications where a DC voltage is utilized to control RF signal levels such as temperature compensation and AGC circuits.

KEY FEATURES

Features	Advantages
High IIP3, +26 to +43 dBm Typ. Over Attenuation Range	Low distortion enabling improved system performance.
Wide Attenuation Range, • 45 dB Typ. at 20 GHz • 51 dB Typ. at 30 GHz • 38 dB Typ. at 40 GHz	Low insertion loss and high dynamic range simplify the use of analog signal control.

40-45		4.1	38.0	33.9	19	

1. Tested in industry standard 3.5x2.5 mm, 16-lead MCLP package.

2. VCTL1 and VCTL2: -4 V (min. attenuation) to 0 V (max. attenuation). Maximum current for VCTL1 or VCTL2: 5 mA (max. at VCTL = -4.V)

3. Min. attenuation state is the insertion loss.

ABSOLUTE MAXIMUM RATINGS⁴

Parameter	Ratings
Operating Case Temperature	-40°C to +85°C
Control Voltage (VCTL1/VCTL2)	-5 to +1 V
Absolute Max. RF Input Level	+23 dBm
Junction Temperature	+150°C
Thermal Resistance at Max. Attenuation	44.8°C/W

4. Permanent damage may occur if any of these limits are exceeded. Maximum ratings are not intended for continuous normal operation.

ASSEMBLY DIAGRAM

ASSEMBLY PROCEDURE

- Storage**
Die should be stored in a dry nitrogen purged desiccators or equivalent.
- ESD**
 MMIC voltage variable attenuator die are susceptible to electrostatic and mechanical damage. Die are supplied in antistatic protected material, which should be open in clean room conditions at an appropriately grounded anti-static workstation.
- Die Handling and Attachment**
Devices need careful handling using correctly designed collets, it is recommended to handle the chip along the edges with a custom design collet. The die mounting surface must be clean and flat. Using conductive silver filled epoxy, recommended epoxies are Ablestik 84-1 LMISR4 or equivalents. Apply sufficient epoxy to meet required epoxy bond line thickness, epoxy fillet height and epoxy coverage around total periphery. Parts shall be cured in a nitrogen filled atmosphere per manufacturer's cure condition. The surface of the chip has exposed air bridges and should not be touched with vacuum collet, tweezers or fingers.
- Wire Bonding**
Bond pad openings in the surface passivation above the bond pads are provided to allow wire bonding to the die gold bond pads. Thermo-sonic bonding is used with minimized ultrasonic content. Bond force, time, ultrasonic power and temperature are all critical parameters. Suggested wire is pure gold, 1mil diameter. Bonds must be made from the bond pads on the die to the packaged or substrate. All bond wires should be kept as short as low as reasonable to minimize performance degradation due to undesirable series inductance.

* Known Good Die ("KGD") means that the die are taken from PCM good wafer and then visually inspected per Mini-Circuits' criteria. Though this is not definitive, it does provide a higher degree of confidence that the die are capable of meeting typical RF electrical parameters specified by Mini-Circuits.

ESD RATING**

Human Body Model (HBM): Class 1A (250 V to < 500 V) in accordance with ANSI/ESD STM5.1-2001

** Tested in industry standard 2.5x3.5 mm, 16-lead MCLP Package.

NOTES

- Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
- Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
- The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained there in. For a full statement of the standard. Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/terms/viewterm.html
- Mini-Circuits does not warrant the accuracy or completeness of the information, text, graphics and other items contained within this document and same are provided as an accommodation and on an As is basis, with all faults.
- Purchasers of this part are solely responsible for proper storing, handling, assembly and processing of Known Good Die (including, without limitation, proper ESD preventative measures, die preparation, die attach, wire bonding and related assembly and test activities), and Mini-Circuits assumes no responsibility therefor or for environmental effects on Known Good Die.

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-40° to 85° C or -40° to 105° C or -55° to 105° C or -45° to 105° C Ambient Environment	Refer to Individual Model Data Sheet
Storage Environment (Die)	-65° to 150°C	Individual Model Data Sheet
Storage Environment(Packaging)	-40° to 70°C and 40 to 60% humidity (In Factory Shipped Package)
