

USB & ETHERNET

RMS Power Sensor

PWR-18RMS-RC

Mini-Circuits

50Ω 0.05 to 18 GHz -60 to +20 dBm True RMS N-Type Male

THE BIG DEAL

- RMS (average) power measurements with 80 dB dynamic range
- Measure wideband modulated & multi-tone signals
- Measure pulsed signals with moderate duty cycles ($\geq 2\%$)
- Integrated LCD display for quick power readings
- Ethernet & USB control

APPLICATIONS

- 5G FR1, WiFi 6E, Bluetooth device testing
- Ku band satcom, radio and radar testing
- Average power measurement of ASK, FSK, OFDM, QAM, LTE modulations

Generic photo used for illustration purposes only.

PRODUCT OVERVIEW

Mini-Circuits' PWR-18RMS-RC is a high-performance and cost-effective RMS power sensor for measurement of average power levels in a diverse range of test applications. The sensor operates from 50 MHz to 18 GHz, detecting input signals as high as +20 dBm and all the way down to -60 dBm. The compact package includes a rubberized outer case for protection and portability, N-type RF input connector, integrated LCD screen, SMB trigger input / output options and Ethernet / USB control.

The included measurement software for Windows walks the user through the power sensor settings, displays the current measurements and provides powerful data recording and export capabilities. A full API for Windows is also provided, with programming instructions and examples for Windows and Linux systems to set up automated power measurements in a range of common programming environments. Full control is available via Ethernet and USB, with the integrated LCD screen providing a convenient local read-out to the operator of power measurements and key settings.

Mini-Circuits has a wide range of high-performance power sensors available on our [website](#). Consider the [PWR-18PWHS-RC](#) peak power sensor if measurements of fast pulses, high crest factor signals or pulse rise / fall times are needed.

KEY FEATURES

Feature	Advantages
True RMS sensor	Cost effective measurements of average power levels over time for a wide range of applications. Measure CW, modulated, pulsed and multi-tone signals with a single sensor.
Wide measurement bandwidth	Accurately measure multi-tone signals and wideband digital modulations (including WiFi devices). The sensor is calibrated for highly accurate average power measurements of signals with bandwidths up to ~100 MHz. Repeatable measurements will be returned over even wider bandwidths (subject to a roll-off in absolute accuracy), permitting use of the sensor for comparison of relative signal levels.
Automatic measurement compensation	Start measuring straight away. The sensor automatically compensates power measurements based on the internal ambient temperature sensor and the user entered measurement frequency.
Flexible control options	Connect with a PC via either Ethernet or USB and measure using the included measurement software or API for automation. Once configured and powered, the sensor can be used as a standalone tool with measurements displayed on the integrated LCD screen.
Trigger in / out	Synchronize measurements between test instrumentation using the external trigger input / output ports.

Video Bandwidth	-	0.05 - 18	-	-	100	MHz
DC Current (I _{DC})	Ethernet disabled	0.05 - 18	-	425	500	mA
	Ethernet enabled ⁵		-	475	550	
Trigger In	Logic Low	-	0	-	0.6	V
	Logic High	-	2.7	-	5.5	
Trigger Out ⁶ (into high impedance load)	Logic Low	-	0	-	0.3	
	Logic High	-	3	-	5.2	
Pulse Modulation	Pulse Width/Interval ⁷	0.05 - 18	500	-	-	μs
	Duty Cycle		2	-	98	%
Effect of Multi-Tone Signals (within span of 100 MHz)	-	0.05 - 18	-	±0.1	-	dB

1. All specifications after 30 minutes warmup time and zeroing.

2. Maximum continuous safe operational power limit: +23 dBm.

3. Tested with CW signal and default sample period. For Sample period < (10 x Signal period), maintain Sample period = (N x Signal period).

4. With "Buffer Mode" setting enabled and "Screen Display - On" setting disabled.

5. When Ethernet control is enabled, it is recommended to use an external power supply (USB-AC/DC-5 or equivalent), a powered hub, or USB 3.0/3.1 port, in order to supply the current.

6. Trigger Out is set momentarily to logic high after each sample period.

7. For sample periods 20 ms or less. Minimum pulse & interval increase for sample periods greater than 20 ms.

**UNCERTAINTY OF POWER MEASUREMENT WITH DIGITAL MODULATION, 25°C⁸**

Modulation	Conditions (dBm)	Frequency (GHz)	Min.	Typ.	Max.	Unit
QPSK, QAM16 & QAM64 in LTE uplink setup (1.4 MHz channels, 3.7 MHz offsets)	-50	0.05 - 18	-	±0.2	-	dB
	-30		-	±0.2	-	
	-10		-	±0.2	-

	-30		-	±0.2	-	
	-10		-	±0.2	-	
	+10		-	±0.2	-	

8. Digital modulation transmission rates are measured in "symbols per second" (sps) and use a bandpass filter on the output to limit spectral spreading.

TYPICAL PERFORMANCE GRAPHS

Uncertainty in Power Measurement @ Low Power Input

Uncertainty in Power Measurement @ High Power Input

Linearity vs. Frequency

Return Loss vs. Frequency

**CONTROL INTERFACES**

Ethernet Control	Supported Protocols	TCP / IP, HTTP, Telnet, DHCP, UDP (limited)
	Max Data Rate	100 Mbps (100 Base-T Full Duplex)
USB Control	Supported Protocols	HID (Human Interface Device) - High-speed
	Min Communication Time ⁹	400 μs typ (full transmit/receive cycle)

9. USB Min Communication Time is based on the polling interval of the USB HID protocol (125 μs polling interval, 64 bytes per packet), medium CPU load and no other high-speed USB devices using the USB bus.

SOFTWARE & DOCUMENTATION

Mini-Circuits' full software and support package including user guide, Windows GUI, API, programming manual and examples can be downloaded free of charge (refer to the last page for the download path).

A comprehensive set of software control options is provided:

- GUI for Windows – Simple software interface for control via Ethernet and USB.
- Programming / automation via Ethernet:
 - Complete set of control commands which can be sent via any supported protocol.
 - Simple to implement in the majority of modern programming environments.
- Programming / automation via USB:
 - DLL files provide a full API for Windows with a set of intuitive functions which can be implemented in any programming environment supporting .Net Framework or ActiveX.
 - Direct USB programming is possible in any other environment (not supporting .Net or ActiveX).

Please contact testsolutions@minicircuits.com for support.

MINIMUM SYSTEM REQUIREMENTS

GUI	Windows 7 or later
USB API DLL	Windows 7 or later and programming environment with ActiveX or .NET support
USB Direct Programming	Linux, Windows 7 or later
HTTP or Telnet	Any computer with a network port and Ethernet-TCP/IP (HTTP or Telnet protocols) support
Hardware	Intel i3 (or equivalent) or later
Control Cable	Power sensor to be used with the supplied USB cable only

GRAPHICAL USER INTERFACE (GUI) FOR WINDOWS - KEY FEATURES

- Connect via USB or Ethernet (HTTP, Telnet) to control the module.
- Control multiple power sensors at once.

- Set compensation frequency and monitor power measurement.
- Configure measurement (offsets, relative power readings, averaging, set trigger mode, etc.).
- Zero the power sensor (recommended at the start of a new measurement session).
- Schedule data recording.

GUI - CONFIGURATION SCREEN

- Set the sample period (the time over which the sensor will average the power) between 100 μs and 1s.
- Select from 3 trigger options:
 1. Free – No trigger / free running measurements.
 2. External On Rise – Measurements are triggered on the rising edge of an external trigger signal.
 3. External On Fall – Measurements are triggered on the falling edge of an external trigger signal.
- Set the buffer size to send over the latest X number of measurements once a SCPI command is received (refer to [programming manual](#) for details).

BLOCK DIAGRAM

ABSOLUTE MAXIMUM RATINGS^{10, 11}

Operating Temperature	0°C to +50°C
Storage Temperature	-30°C to +70°C
DC Voltage at RF Ports	5 V
Trigger In	-0.3 to 5.5 V
CW Power	+26 dBm

10. Permanent damage may occur if any of these limits are exceeded.
 11. Operating in the range between operating power limits and absolute maximum ratings for extended periods of time may result in reduced life and reliability.

CONNECTIONS

Port Name	Connector Type
RF Input	N-type Male
Trigger In	SMB Male
Trigger Out	SMB Male
USB	USB type-C (with screw lock)
Ethernet	RJ45 Socket

CASE STYLE DRAWING (JL3470)

NOTES:

1. Case material: Aluminum alloy.
2. Case Finish: Nickel Plate.
3. Dimensions: Inches [mm]. Tolerances 2 Pl. ±.03 inch; 3 Pl. ±.015 inch.
4. Weight: 260 grams
5. Marking may contain other features or characters for internal lot control.
6. Maximum torque 8 in-lb (90 N-cm).
7. Unit provided with removable protective sleeve (see image below).

Note 7

INCLUDED ACCESSORIES ¹²

	Part No.	Qty.	Description
	USB-CBL-AC-7SC+	1	7.0 ft (2.0 m) USB Cable: USB type A (Male) to USB type C (Male)
	CBL-5FT-BMSMB+	1	5.0 ft (1.5 m) Trigger cable: BNC (Male) to SMB (Female)

12. Additional quantities are available to purchase as optional accessories.

OPTIONAL ACCESSORIES

	Part No.	Description
	CBL-RJ45-MM-5+	5.0 ft (1.5 m) Ethernet cable: RJ45 (Male) to RJ45 (Male) Cat 5E cable
	NF-SF50+	N-Type Female to SMA Female Adapter
	NF-SM50+	N-Type Female to SMA Male Adapter
	NF-BM50+	N-Type Female to BNC Male Adapter
	USB-AC/DC-5+	AC/DC +5V power adaptor with USB connector ^{13,14}

13. Includes power plugs for US, UK, EU, IL, AU & China. Plugs for other countries are also available. If you need a power cord for a country not listed please contact testsolutions@minicircuits.com

14. Power adaptor, powered hub or USB 3.0/3.1 port may be used to provide power when in Ethernet control, not needed in USB control.

Environmental Specifications **ENV50**

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-0° to 50° C Ambient Environment	Individual Model Data Sheet
Storage Temperature	-30° to 70° C Ambient Environment	Individual Model Data Sheet
Operating and Storage Humidity	5% to 85% RH (non-condensing)	Ambient
Bench Handling Test	Bench Top Tip 45° & Drop	MIL-PRF-28800F
Transit Drop Test	Free Fall Drop, 20 cm (7.9 inches)	MIL-PRF-28800F Class 3
