

# Surface Mount Low Pass Filter

## SXLP-16+

50Ω

DC to 16 MHz

### The Big Deal

- Low Insertion Loss typical 0.5 dB
- Sharp roll-off
- Wide band rejection till 2200 MHz
- Very good VSWR typical 1.3:1
- Miniature shielded package

CASE STYLE: HF1139

### Product Overview

The SXLP-16+ is a lowpass filter in a shielded package (size of 0.440" x 0.740" x 0.270") fabricated using SMT technology. Covering DC to 16 MHz band width, these units offer good matching within the passband and high rejection typical 40 dB. This model uses a miniature high Q capacitors and wire welded inductors for high reliability. In addition it has repeatable performance across production lots and consistent performance across temperature.

### Key Features

| Feature                              | Advantages                                                                                           |
|--------------------------------------|------------------------------------------------------------------------------------------------------|
| Sharp roll-off                       | Sharp roll-off, this will attenuate frequencies closer to the passband with good rejection.          |
| Good ultimate rejection              | This enables the filters to attenuate spurious signals and reject harmonics for broadband frequency. |
| Small size, 0.440" x 0.740" x 0.270" | The small surface mount package enables the SXLP-16+ to be used in compact designs.                  |

Mini-Circuits carrier tape materials provide protection from ESD (Electro-Static Discharge) during handling and transportation. Tapes are static dissipative and comply with industry standards EIA-481/EIA-541.
