### PRODUCT OVERVIEW

Mini-Circuits' ULC-SMSM+ are Ultra-Flexible cables which provide wideband performance from DC to 18 GHz with low insertion loss and excellent VSWR. The cable is designed for stability of phase and amplitude versus flexure while offering tremendous durability and reliability. Its unique construction of a triple shielded cable with a unique molded boot allows the cable to have the greatest of flexibility and yet handle the demanding lab environments where constant bending and flexing are required. In addition, they feature SMA-M to SMA-M stainless steel connectors. Available from stock in a variety of lengths to support many different requirements.

### KEY FEATURES

Feature	Advantages
Ultra-Flexible 0.75 inch static bend radius 2.0 inch dynamic bend radius	Supports a wide range of test measurements in which tight bends are needed to be made.
Excellent stability of phase and insertion loss versus flexure	ULC-Series test cables have been tested in bend radii as tight as 2.0 inches to qualify minimal change in insertion loss, insertion phase, and VSWR, providing reliable performance in a wide range of configurations.
Performance qualified to 20,000 flexures	Like all Mini-Circuits test cables, ULC-Series models have been performance qualified up to 20,000 bend cycles, ensuring outstanding durability and extra long life.
