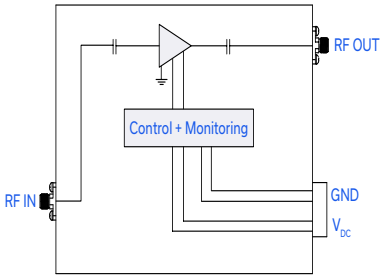
FUNCTIONAL DIAGRAM



PRODUCT OVERVIEW

The ZHL-2G08G0030+ is a Class C, solid-state connectorized high-power amplifier module which can be used in a wide range of broadband test applications from 2 to 8 GHz band. This rugged amplifier is capable of amplifying CW signals with 20W minimum saturated output power with 28V supply voltage over the operating bandwidth. The typical small signal gain is 52 dB with a flatness of ±2 dB.

The ruggedly designed amplifier provides unconditional stability and built-in self-protection against reverse polarity, excessive drive and overheating. It is capable of withstanding short and open circuits at output while continuously delivering 10W of power. The amplifier operating baseplate temperature is between -30 to +80°C. The amplifier is designed to have a compact size of 100 x 100 x 30 mm and a light weight of 750 grams.

KEY FEATURES

Features	Advantages
Broadband 30W (typ), Useable from 2 to 8 GHz	Suitable for a broad range of high-power wideband applications, including test setups, communications and defense applications.
High Gain, 52 dB	Enables signal amplification to 30W (typ), 20W (min) output without the need for multiple gain stages.
Built-in self-protection	In instances of potentially damaging excessive drive current, heat buildup within the housing, shorting of DC supply, and short or open loads at the output, an automatic sensing feature signals the unit to power down.
Unconditional stability	Provides reliable performance independent of input and load conditions.
Small and lightweight	With a small footprint (100mm x 100mm x 30mm) the lightweight (515 grams) modular design.
Cooling	The amplifier can either be air or water cooled. Mounting screw holes are available on the amplifier.
Low voltage	The ZHL-2G08G0030+ is powered by a low voltage of 28V supply.
