REPLACEMENT PART REFERENCE GUIDE, GP2Y1A+ AN-10-027

Original Part:	GP2Y1+	Replacement Part:	GP2Y1A+	

Replacement Part has been judged by Mini-Circuits Engineering as a suitable replacement to Original Part.

MECHANICAL DIMENSIONS

Case Style: DQ1225
Both the GP2Y1A+ and GP2Y1+ uses the same case style DQ1225 case style.

CONCLUSION:

1) **FORM-FIT-FUNCTIONAL ANALYSIS$_a$**:

The Replacement Part GP2Y1A+ has the same form and fit as he original part GP2Y1+

The Replacement Part maximum power handling and operating temperature on the Absolute Maximum Table were changed. The Replacement Part's maximum input power as a splitter is now +40dBm at 25C instead of the Original Part's maximum input power as a splitter of 1.5W (+31.76dBm). Replacement Part's maximum internal dissipation power is now +38dBm at 25C instead of the Original Part's maximum internal dissipation power of 0.75W (+28.75dBm).

Additionally, the Replacement Part's maximum operating temperature is now +105°C instead of the Original Part's maximum operating temperature of 85°C

Replacement Part and Original Part feature the same expected performance. See section 2 for Min. Max and Typical performance and graphs.
