## The Big Deal

- LTCC construction
- Temperature stable from -55 to $+100^{\circ} \mathrm{C}$
- Small size ( $0.126 \times .063$ X .037")

## Product Overview

The BFCN-1860+ LTCC bandpass filter covers the 1580 to 2200 MHz passband with 2 dB passband insertion loss and 20 dB upper/lower stopband rejection. This model handles up to 2.5W RF input power and provides a wide operating temperature range from -55 to $+100^{\circ} \mathrm{C}$. Utilizing LTCC multi-layer construction, the filter achieves excellent repeatability of performance and comes in a tiny 1206 ceramic package with wraparound terminations, minimizing performance variations due to parasitics and saving space in dense PCB layouts.

## Key Features

| Feature | Advantages |
| :--- | :--- |
| LTCC Construction | Provides a rugged package well suited for tough environments such as high humidity <br> and temperature extremes. |
| Tiny size $\left(0.126 \times .063 \times .037^{\prime \prime}\right)$ | Saves space in dense circuit boards and minimizes the effects of parasitics. |
| Wrap-around terminations | Provides excellent solderability and easy visual inspection |
| Wide operating temperature range, <br> -55 to $+100^{\circ} \mathrm{C}$ | Enables reliable performance in extreme environments |

## Bandpass Filter

$50 \Omega \quad 1580$ to 2200 MHz

## Features

- Good VSWR, 1.5:1 typ. @ passband
- Small size(0.126 x . $063 \times .037$ )
- Temperature stable
- LTCC construction

## Applications

- Harmonic rejection
- Transmitters / Receivers

1. Measured on Mini-Circuits Characterization Test Board TB-824+.
2. This filter is not intended for use as a DC Blocking circuit element. In Application where DC voltage is present at either input or output ports, blocking capacitors are required at the corresponding RF port.

Maximum Ratings

| Operating Temperature | $-55^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$ |
| :--- | :---: |
| Storage Temperature | $-55^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$ |
| RF Power Input ${ }^{\star}$ | 2.5 W at $25^{\circ} \mathrm{C}$ |

*Passband rating, derate linearly to 0.7 W at $100^{\circ} \mathrm{C}$ ambient
Permanent damage may occur if any of these limits are exceeded.
