## The Big Deal

- Broader bandwidth
- High Rejection
- Miniature shielded package

## Product Overview

BPF-BC300A+ is a $50 \Omega$ bandpass filter in a shielded package fabricated using SMT technology. This bandpass filter covers from 260 to 340 MHz . This filter build with high Q capacitors and wire welded inductors for high reliability. This filter offers sharp rejection and low insertion loss for use in Test and measurement system applications.

## Key Features

| Feature | Advantages |
| :--- | :--- |
| Low insertion loss | Can be used in Transmitters/Receivers application |
| Good rejection | This enables the filter attenuate spurious signals and reject harmonics for broad frequency band |
| Shielded package | The small surface mount package enables the BPF-BC300A+ to used in compact design |
