MMIC MICROWAVE

# Gain Equalizer

EQY-0-123+

50Ω 0 dB DC to 12 GHz

## THE BIG DEAL

- Wideband, DC to 12 GHz
- Linear Positive Slope Across Operating Band
- Excellent Return Loss, 20 dB Typ.
- 1.5x1.5 mm, 6-Lead QFN-Style Package

## APPLICATIONS

- Test & Measurement Equipment
- Satellite Communications
- Radar, EW, and ECM Defense Systems

Generic photo used for illustration purposes only

## FUNCTIONAL DIAGRAM (TOP VIEW)

## PRODUCT OVERVIEW

EQY-0-123+ is a wideband, absorptive gain slope equalizer fabricated using a highly reliable and repeatable GaAs MMIC IPD process. Operating from DC to 12 GHz, this model achieves outstanding linear slope while maintaining excellent return loss throughout the entire band due to its absorptive design. This model is packaged in a compact 1.5x1.5 mm package, making it an ideal choice for dense circuit layouts across a wide range of applications such as Test & Measurement, Satellite Communications, Radar, EW, and ECM Defense Systems.

## KEY FEATURES

| Feature                             | Advantages                                                                                                                                                                                                             |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Wideband Operation, DC to 12 GHz    | Broadband positive gain slope equalization can effectively compensate for negative gain slope of amplifiers, receivers, transmitters and transmission lines to achieve flat gain across frequency in wideband systems. |
| Excellent Return Loss, 20 dB Typ.   | Excellent return loss across the full frequency range minimizes unwanted reflections and enables this model to be seamlessly cascaded within wideband signal chains.                                                   |
| 1.5x1.5 mm 6-Lead QFN-Style Package | Small footprint saves space in dense layouts while providing low inductance and excellent thermal contact to the PCB. Industry-standard packaging allows for ease of assembly in high-volume manufacturing processes.  |

## TYPICAL PERFORMANCE GRAPHS

ABSOLUTE MAXIMUM RATINGS<sup>3</sup>

| Parameter             | Ratings         |
|-----------------------|-----------------|
| Operating Temperature | -55°C to +105°C |
| Storage Temperature   | -65°C to +150°C |
| RF Input Power        | +30 dBm         |

3. Permanent damage may occur if any of these limits are exceeded. Maximum ratings are not intended for continuous normal operation.

## THERMAL RESISTANCE

| Parameter                                         | Ratings   |
|---------------------------------------------------|-----------|
| Thermal Resistance ( $\Theta_{JC}$ ) <sup>4</sup> | 425.4°C/W |

4.  $\Theta_{JC}$  = (Hot Spot Temperature on Die - Temperature at Ground Lead) / Dissipated Power

## ESD RATING

|     | Class | Voltage Range | Reference Standard          |
|-----|-------|---------------|-----------------------------|
| HBM | 2     | > 2000 V      | ANSI/ESD STM 5.1 - 2001     |
| CDM | C3    | > 1000 V      | ANSI/ESDA/JEDEC JS-002-2022 |

ESD HANDLING PRECAUTION: This device is designed to be Class 2 for HBM. Static charges may easily produce potentials higher than this with improper handling and can discharge into DUT and damage it. As a preventive measure Industry standard ESD handling precautions should be used at all times to protect the device from ESD damage.

## MSL RATING

Moisture Sensitivity: MSL1 in accordance with IPC/JEDEC J-STD-020E /JEDEC J-STD-033C
