

# Monolithic Amplifier

LHA-13LN+

1 MHz to 1 GHz

#### THE BIG DEAL

- Ultra-High IP3, +38.3 dBm typ.
- Gain, 22.4 dB typ. at 0.5 GHz
- Low supply voltage, +3 to +5V
- Excellent Noise Figure, 1.1 dB typ.

CASE STYLE: DQ1225

+RoHS Compliant
The +Suffix identifies RoHS Compliance.
See our website for methodologies and qualifications

#### **APPLICATIONS**

- · Base station infrastructure
- CATV
- Cellular

#### **PRODUCT OVERVIEW**

LHA-13LN+ (RoHS compliant) is an advanced wideband amplifier fabricated using E-PHEMT technology and offers extremely high dynamic range over a broad frequency range and with low noise figure. In addition, the LHA-13LN+ has good input and output return loss over a broad frequency range. LHA-13LN+ is enclosed in a 3mm x 3mm, 12-lead MCLP package and has very good thermal performance.

#### **KEY FEATURES**

| Feature  | Advantages  |  |  |
|--|---|--|--|
| Broad Band: 1 MHz to 1 GHz   | Broadband covering primary wireless communications bands: VHF, UHF, Cellular  |  |  |
| Extremely High IP3<br>+36.1 dBm typical at 1 MHz<br>+38.3 dBm typical at 0.5 GHz | The LHA-13LN+ matches industry leading IP3 performance relative to device size and power consumption. The combination of the design and E-PHEMT Structure provides enhanced linearity over a broad frequency range as evidence in the IP3 being approximately 13-17 dB above the P1dB point. This feature makes this amplifier ideal for use in:  • Driver amplifiers for complex waveform up converter paths  • Drivers in linearized transmit systems  • Secondary amplifiers in ultra-High Dynamic range receivers |  |  |
| Low Noise Figure, 0.9 dB at 0.5 GHz  | Enables lower system noise figure performance and along with High OIP3 provides high dynamic range  |  |  |
| Low Supply Voltage   | LHA-13LN+ supports low supply voltage operations which indicate low power consumption   |  |  |
