# **Low Pass Filter**

LPF-B375+

50 $\Omega$  DC to 375 MHz

### **The Big Deal**

- · Good passband Insertion loss, 1 dB typical
- High rejection, 50 dB typical from 450-3000 MHz
- Fast roll-off
- Good VSWR, 1.3:1 typical in passband
- Miniature shielded package

CASE STYLE: HZ1198

### **Product Overview**

The LPF-B375+ is a lowpass filter in a shielded package (size of 0.472" x 0.826" x .22") fabricated using SMT technology. Covering DC-375 MHz band width, these units offer good matching within the passband and high rejection. This unit uses a miniature high Q capacitors and wire welded inductors for high reliability. In addition it has repeatable performance across production lots and consistent performance across temperature.

## **Key Features**

Feature	Advantages
Low frequency and good passband Insertion loss, 1 dB typical	Low insertion loss will be used in designs optimized for high performance applications.
Fast roll-off	Fast roll-off, this will attenuate frequencies closer to the passband with good rejection value of 72 dB.
Good ultimate rejection	This enables the filters to attenuate spurious signals and reject harmonics for broadband frequency.
Good VSWR, 1.3:1 typical in passband	The model has very good return loss for this bandwidth and provides good interface when used with others devices.

### Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuit standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits website at www.minicircuits.com/MCLStore/terms.jsp

Frequency (MHz)

**Group Delay** 

(nsec)

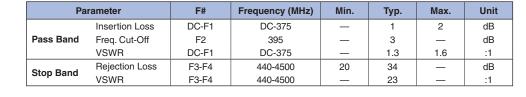

### **Features**

- High rejection, 36 dB typical
- · Sharp insertion loss roll-off
- Miniature shielded case
- · Aqueous washable

### **Applications**

- Defence communications
- Transmitters / receivers
- · Harmonic rejection

## **Functional Schematic**

Typical Performance Data at 25°C

VSWR (:1)

Electrical Specifications at 25°C

Maximum Ratings							
Operating Temperature	-40°C to 85°C						
Storage Temperature	-55°C to 100°C						
RF Power Input	1 W max.						

Permanent damage may occur if any of these limits are exceeded
