## THE BIG DEAL

- High Isolation, 56 dB typ.
- High Input IP3, +46.5 dBm typ.
- Low Insertion Loss, 0.6 dB typ.
- Fast Rise/Fall time, 3.3 ns / 4.6 ns typ.
- Tiny Size, $3.25 \times 3.25 \times 0.9 \mathrm{~mm}$

## PRODUCT OVERVIEW

The M3SWA-2-50DRB+ is a high isolation fast switching absorptive GaAs PHEMTSPDT switch with an internal driver. It operates at $+5 \mathrm{~V} \&-5 \mathrm{~V}$ power supplies and has a single TLL compatible control port. It has been designed for wideband operation and packaged in a tiny $3.25 \mathrm{~mm} \times 3.25 \mathrm{~mm}$, 8-lead package.

KEY FEATURES

| Features | Advantages |
| :---: | :---: |
| Wideband, DC to 4.5 GHz | One model can be used in many applications, saving component count. Also ideal for wideband applications such as military and instrumentation. |
| Absorptive Switch | In the OFF condition, RF output ports which are not switched ON are terminated into $50 \Omega$. This enables proper impedance termination of the circuitry following the RF output ports, preventing any unintended action such as oscillation. |
| High Isolation: <br> - 62 dB at 1000 MHz <br> - 35 dB at 4500 MHz | High isolation significantly reduces leakage of power into OFF ports. |
| High Linearity: Input power at P1dB, 25.4 dBm typ. Input IP3, +46.5 dBm typ. | High linearity minimizes unwanted inter modulation products which are difficult or impossible to filter in multicarrier environments such as CATV, or in the presence of strong interfering signal from adjacent circuitry or received by antenna. |
| Form-fit compatible with M3SWA-2-50DR+ | Fits into existing PCB footprint designed for M3SW-2-50DR+ with minor electrical differences. |
| Tiny size, $3.25 \times 3.25 \mathrm{~mm}$ MCLP package | Tiny footprint saves space in dense layouts while providing low inductance, repeatable transitions, and excellent thermal contact to the PCB. |
