

## Monolithic Amplifier

TSS-23HLN+

 $50\Omega$  30 MHz to 2 GHz

#### **THE BIG DEAL**

- High IP3, +42.6 dBm typ. at 1GHz
- Gain, 21.8 dB typ. at 1 GHz
- · Low noise figure, 1.4 dB at 1 GHz
- High P1dB, +28.5 dBm at 1 GHz
- Shutdown feature

Generic photo used for illustration purposes only

CASE STYLE: DQ1225

+RoHS Compliant
The +Suffix identifies RoHS Compliance.
See our website for methodologies and qualifications

#### **APPLICATIONS**

- Base station infrastructure
- CATV
- Cellular

#### **PRODUCT OVERVIEW**

TSS-23HLN+ (RoHS compliant) is an advanced wideband amplifier with shutdown feature. It is fabricated using E-PHEMT technology and offers extremely high dynamic range over a broad frequency range and with low noise figure. In addition, the TSS-23HLN+ has good input and output return loss over a broad frequency range. TSS-23HLN+ is enclosed in a 3mm x 3mm, 12-lead MCLP package and has very good thermal performance.

#### **KEY FEATURES**

| Feature  | Advantages   |
|--|--|
| Broad Band: 30MHz to 2GHz  | Broadband covering primary wireless communications bands: VHF, UHF, Cellular   |
| Extremely High IP3<br>+39.6 dBm typical at 30 MHz<br>+42.6 dBm typical at 1GHz | The TSS-23HLN+ matches industry leading IP3 performance relative to device size and power consumption. The combination of the design and E-PHEMT Structure provides enhanced linearity over a broad frequency range as evidence in the IP3 being approximately 13-15 dB above the P1dB point. This feature makes this amplifier ideal for use in:  • Driver amplifiers for complex waveform up converter paths • Drivers in linearized transmit systems • Secondary amplifiers in ultra-High Dynamic range receivers |
| Shutdown feature   | Allow users to turn on and off the amplifier with pulsed signals while keeping the power supply at constant voltage to minimize DC power consumption   |
| Low Noise Figure, 1.4 dB at 1 GHz  | Enables lower system noise figure performance and along with High OIP3 provides high dynamic range   |
| High P1dB , +28.5 dBm at 1 GHz   | High P1dB, High OIP3, Low NF results in a very dynamic range preventing amplifier saturation under strong interfering signals.   |
