

50Ω DC to 30 MHz

The Big Deal

- Low Insertion loss, 1.8dB Typ.
- High rejection, > 40dB
- Sharp insertion loss roll-off
- Good VSWR
- · Ultra miniature surface mount package

Product Overview

The ULP-30+ is a lowpass filter in a top hat package (size of 0.25" x 0.25") fabricated using SMT technology. Covering DC to 30 MHz band width, these units offer good matching within the passband and high rejection. This model uses a miniature high Q capacitors and chip inductors for high reliability. In addition it has repeatable performance across production lots and consistent performance across temperature.

Key Features

Feature	Advantages	
Low passband insertion loss	Passband insertion loss 1.8dB typical ensures low signal loss throughout the passband	
Excellent stopband rejection	Rejection of 40 dB ensures unwanted spurious are eliminated	
Excellent return loss at DC-30 MHz	This makes signal transmission with very less reflections and well-matched with the adjacent com- ponent used in the system	
Small size, 0.25" x 0.25"	The Ultra miniature surface mount package enables the ULP-30+ to be used in compact designs.
