ZASW-2-50DRA+

 $DC^2 - 5000 MHz$

The Big Deal

- Wide bandwidth DC² to 5000 MHz
- High Isolation, 60 dB typ.
- Very fast switching, 20ns typ.
- Low video break thru 45 mVp-p typ.

CASE STYLE: CY353

Product Overview

The ZASW-2-50DRA+ is an excellent high isolation, solid state SPDT, reflective RF switch. With its broad frequency range, fast switching time and excellent RF performance, the ZASW-2-50DRA+ is an excellent replacement for the Mini-Circuits' legacy switch model ZASW-2-50DR+. Refer app note AN-80-020 for more details. The wide bandwidth, high isolation and fast switching characteristics makes this switch a versatile choice for several RF applications & systems.

Key Features

Feature	Advantages		
Integrated TTL Driver	-Operates at +5V to -5V -Low control current allows compatibility with a variety of driver circuits -Fast 20 ns typ.Switching time		
Excellent for a Variety of Applications From Bench to Integrated Systems	-High speed testers -Automated switching networks -Wireless Infrastructure -Military		
Excellent RF Performance	-Wide bandwidth: DC ² to 5000 MHz -Good Insertion Loss: 2.5 dB Typ -Low video leakage, 45 mVp-p typ.		

^{2.} All RF connections must be blocked or held at 0V DC. Low frequency is determined by value of Coupling capacitors at RF ports.

Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.ninicircuits.com/MCLStore/terms.jsp

SPDT RF Switch

50Ω DC²-5000 MHz

Reflective RF Switch with Internal Driver Dual Supply Voltage, +5V to -5V

Product Features

- Wide bandwidth, DC2 to 5000 MHz
- · Good Insertion loss, 2.5 dB typ.
- Internal TTL driver
- Fast switching, Rise/fall time, 4 ns typ.
- Wide operating temperature, -20°C to +85°C

- ISM, WCDMA, WIMAX
- PCN
- · Automated switching networks
- Military

General Description

The ZASW-2-50DRA+ is a 50Ω reflective, high isolation SPDT RF switch. It is designed for RF/wireless applications covering a broad frequency range from DC² to 5000 MHz with good insertion loss and Isolation. The ZASW-2-50DRA+ operates with a dual supply voltage $\pm 5V$. This unit includes an internal driver circuitry which makes it easier to control switching with standard voltage levels.

Schematic and Application Circuit

2. All RF connections must be blocked or held at 0V DC. Low frequency is determined by value of Coupling capacitors at RF ports.

Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein.
