PRODUCT OVERVIEW

Mini-Circuits' ZC8PD-E18673+ is a wideband 8-way 0˚ power splitter/combiner. It provides coverage from 18 to 67 GHz (Ka band & V band) , supporting a wide range of applications including 5G, Defense, Instrumentation and many more. This model provides 12W power handling as a splitter and very low insertion loss across the entire operating frequency range, minimizing power dissipation and delivering excellent signal power transmission from input to output. The ZC8PD-E18673+ comes housed in a case measuring 1.18 x 4.08 x 0.5'' with 1.85mm female connectors

KEY FEATURES

Features	Advantages
Wideband, 18 to 67 GHz	Extremely wide frequency range supports many broadband applications in a single model.
Low insertion loss, 3 dB typ.	The combination of 12W power handling and low insertion loss makes this model a suitable candidate for distributing signals while maintaining excellent transmission of signal power.
High isolation, 29 dB typ.	Minimizes interference between ports
High power handling: • 12W as a splitter at 25°C • 3.6W as a combiner at 25°C	The ZC8PD-E18673+ is suitable for systems with a wide range of power requirements.
Low amplitude unbalance, 0.8 dB	Produces nearly equal output signals, ideal for parallel path and multichannel systems.
DC Passing, 350mA as a splitter	Supports applications where DC power is needed through the RF line.
