## Product Overview

Mini-Circuits' ZN2PD2-14W-S+ is a 2-way $0^{\circ}$ high-power splitter/combiner providing up to 35 W power handling as a splitter ( 1.0 W as a combiner) and low insertion loss across the entire 500 to 10500 MHz frequency range. Its outstanding combination of high power handling and low loss minimize power dissipation and provide excellent signal power transmission from input to output. The ZN2PD2-14W-S+ comes housed in a rugged aluminum alloy case measuring $4.5 \times 2.5 \times 0.67$ " with SMA connectors.

Electrical Specifications at $25^{\circ} \mathrm{C}$

1. All outputs must terminate 50 ohm (VSWR 1.5:1 or better)
2. As a combiner of non-coherent signals, max. power per port is 1.0 watt power rating divided by number of ports.
3. Alternative heat sinking and heat removal must be provided by the user to limit maxmum base-plate temperature to $60^{\circ} \mathrm{C}$, in order to ensure proper performance. For reference, this requires thermal resistance of user's external heat sink to be $10^{\circ} \mathrm{C} / \mathrm{W}$.
