## The Big Deal

- Wideband, 350 to 6000 MHz
- High power, up to 25 W as a splitter
- Low insertion loss, 0.9 dB
- Low unbalance, $0.1 \mathrm{~dB}, 2^{\circ}$
- High isolation, 20 dB

## Product Overview

Mini-Circuits' ZN2PD2-63-S+ is a 2-way $0^{\circ}$ high-power splitter/combiner providing up to 25 W power handling as a splitter (1.0W as a combiner) and low insertion loss across the entire 350 to 6000 MHz frequency range. Its outstanding combination of high power handling and low loss minimize power dissipation and provide excellent signal power transmission from input to output. The ZN2PD2-63-S+ comes housed in a rugged aluminum alloy case measuring $4.5 \times 2.5 \times 0.67$ " with SMA connectors.

## Key Features

| Feature | Advantages |
| :--- | :--- |
| Wideband, 350 to 6000 MHz | This model supports bandwidth requirements for a wide variety of applications. |
| High power handling: <br> $\bullet$ 25W to 3600 MHz <br> $\bullet 15 \mathrm{~W}$ to 6000 MHz | The ZN2PD2-63-S+ is suitable for systems with a wide range of power requirements. |
| Low insertion loss, 0.9 dB | The combination of 25W power handling and low insertion loss makes this model a <br> suitable candidate for distributing signals while maintaining excellent transmission of <br> signal power. |
| Low unbalance: <br> $\bullet 0.1$ <br> $\bullet 2^{\circ}$ dB amplitude unbalance unbalance | Produces nearly equal output signals, ideal for parallel path and multichannel systems. |
| High isolation, 20 dB | Minimizes interference between ports. |
| DC Passing, 600 mA ( 300 mA each port) | Supports applications where DC power is needed through the RF line. |

| Power Handling ${ }^{3}$ | As Splitter ${ }^{1}$ | $\begin{gathered} \hline 350-3600 \\ 3600-6000 \\ \hline \end{gathered}$ | $-$ | - | $\begin{aligned} & 25 \\ & 15 \\ & \hline \end{aligned}$ | W |
|  | As Combiner ${ }^{2}$ | 350-6000 | - | - | 1.0 |  |

1. All outputs must terminate 50 ohm (VSWR 1.5:1 or better)
2. As a combiner of non-coherent signals, max. power per port is 1.0 watt power rating divided by number of ports.
3. Alternative heat sinking and heat removal must be provided by the user to limit maxmum base-plate temperature to $60^{\circ} \mathrm{C}$, in order to ensure proper performance. For reference, this requires thermal resistance of user's external heat sink to be $10^{\circ} \mathrm{C} / \mathrm{W}$.

## Features

- wideband, $350-6000 \mathrm{MHz}$
- excellent amplitude unbalance, 0.1 dB typ.
- excellent phase unbalance, 2 deg. typ.
- up to 25 W power input as splitter

## Applications

- UHF TV
- cellular/ISM/SMG/GSM
- satellite distribution
- GPS/L BAND (MARSAT)
- PCS/DCS/UMTS
- MMDC
- SATCOM
