## THE BIG DEAL

－Ultra wideband operation， 10 MHz to 67 GHz
－High Isolation， 45 dB
－Low VSWR，1．4：1 typ．Across Operating Band
－All－OFF State Available
－Bi－directional

## PRODUCT OVERVIEW

Mini－Circuits＇ZSW4－E673＋is an SP4T reflective，solid－state switch with an internal driver．This switch is designed for wideband operation from 10 MHz to 67 GHz and supports many applications requiring high performance from 5G infrastructure to automated test equipment and various defense applications．The bidirectional switch provides excellent isolation，and high linearity．It operates on a positive +5.0 V supply and utilizes standard 3.3 V TTL logic．The switch comes housed in a compact， aluminum alloy case（ $1.48^{\prime \prime} \times 1.39^{\prime \prime} \times 0.71^{\prime \prime}$ ）with 1.85 mm －female connectors at all RF ports and a 10－pin digital control snap connector for DC power and control signals．

## KEY FEATURES

| Feature | Advantages |
| :--- | :--- |
| Ultra Wideband， 10 MHz to 67 GHz | One model can be used in many applications，ideal for wideband applications such as military and <br> instrumentation． |
| Low VSWR，1．4：1 across the entire band | Low VSWR across the entire band helps to improve system performance by reducing component <br> interaction． |
| High Isolation， 45 dB Across Operating Band | High isolation significantly reduces leakage of power into OFF ports． |

4. Operation of this device above any of these conditions may cause permanent damage.
5. Operation in the range between the max operating power and the absolute maximum rating for extended periods of time may result in reduced life and reliability.
6. Do not apply DC voltage at any of the RF ports. In Application where DC voltage is present at either input or output port, coupling capacitors are required. For DC Block, please use Mini Circuits P/N. BLK-E653+
7. Applicable at any port.
8. Compression level not noted as it exceeds max safe operating power level

## INCLUDED ACCESSORIES

CBL-5FT-MPD+ is a "Pigtail" connector included with every purchase of ZSW4-E673+. CBL-5FT-MPD+ is a shielded cable with stripped wires (\#32AWG) on one end and a connector on the other end designed to mate to the ZSW4-E673+. These bare wires enable the customer to assemble their own cable as required to interface with the ZSW4-E673+ (cable length is $4.9 \mathrm{ft} /$ 1.5 meters).
