

Rear Panel (COM Ports of each SPDT Switch)

Each USB-1SP2T-63VHX module (24 total) will be controlled as a single SPDT switch with 3 states:

| State | Summary |
| :---: | :--- |
| $\mathbf{0}$ | All ports (COM, J1 \& J2) terminated internally |
| $\mathbf{1}$ | COM connected to $\mathrm{J} 1 ; \mathrm{J} 2$ terminated internally |
| $\mathbf{2}$ | COM connected to J ; J 1 terminated internally |

## RF Component List:

| ID | Quantity | Model Name | Requirement |
| :--- | :---: | :--- | :--- |
| SW1-SW24 | 24 | USB-1SP2T-63VHX | High Isolation / Power Solid-State SPDT |

## Daisy-Chained Control Connection

Multiple ZT-24SP2T-63VH racks (each with $24 \times$ SPDT) can be daisy-chained together via their respective SPI Out \& SPI In ports. Control for the full chain will be achieved via the single USB or Ethernet connection to the Master unit.

Mechanical Specifications: Outline Drawing 99-01-2580

| Dimensions | 19" (W) x 4U max (H) x 20" (D) |
| :---: | :---: |
| Case Material | Aluminum (with protective coatings to prevent corrosion) |
| Support | Rack-mounted slide rails; similar to ZT-20X6NB. See photo |
| RF Connectors | N-type (female) |
| Front Panel Marking | Line 1: Mini-Circuits part number Line 2: $24 \times$ SPDT Switch Rack |
| Front panel | a) ON/OFF switch with indicator light <br> b) Carry handles <br> c) $48 \times$ RF connections (RF1 and RF2 of each switch) - N-type female |
| Rear panel | a) $24 \times$ RF connections (COM of each switch) - N-type female <br> b) AC mains power supply input <br> c) USB \& RJ45 control connections <br> d) Label with date code/serial number/MCL part\# for traceability |
| Power supply | AC mains power supply ( $90-260 \mathrm{~V}, 47-63 \mathrm{~Hz}$ ) |
| Control Interface | USB and Ethernet TCP/IP supporting HTTP and TELNET protocols |
| Software support | a) Mini-Circuits GUI for manual testing (Windows) <br> b) ASCII / SCPI commands for automation through Ethernet <br> c) ActiveX/.NET DLLs for USB automation in a Windows environment <br> d) Interrupt codes for USB automation in a Linux environment |
| Operating temp | $0^{\circ}$ to $+50^{\circ} \mathrm{C}$ |

## Electrical Specifications per Switch @ +25 ${ }^{\circ} \mathrm{C}$ :

| Parameter | Condition | Min | Typ | Max | Unit |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Frequency |  | 600 |  | 6000 | MHz |
| Path Loss <br> (COM to any J Port) | $600-2500 \mathrm{MHz}$ |  | 4.0 | 5.5 |  |
|  | $2500-5000 \mathrm{MHz}$ |  | 4.5 | 6.0 | dB |
|  | $5000-6000 \mathrm{MHz}$ |  | 5.0 | 6.5 |  |
| Isolation <br> (Between J Ports) | $600-2500 \mathrm{MHz}$ | 100 | 110 |  | dB |
|  | $2500-5000 \mathrm{MHz}$ | 100 | 105 |  |  |
|  | $5000-6000 \mathrm{MHz}$ | 100 | 103 |  |  |
| Return Loss <br> (All Ports) | $600-6000 \mathrm{MHz}$ |  | 17.69 |  | dB |
| Input Power <br> (Through Path) | COM Port |  |  | 2 | W |
|  | Per Port (J1 and J2) |  |  | 2 | W |
| Total Power <br> Dissipation |  |  |  | 4 | W |

Electrical Performance per Switch $@+25^{\circ} \mathrm{C}$ :
