Product Overview

Mini-Circuits' ZTM series modular switch & attenuator systems offer flexibility and fast turnaround for automated test setups. The design consists of a 19" rack chassis (3U height) comprising up to 12 open hardware slots on the front panel, customizable from a wide range of switch or attenuator options:

- Mechanical SPDT, SP4T, SP6T, SP8T or transfer switches, with options up to 50 GHz
- Programmable attenuators with up to 120 dB range (4 GHz), 110 dB range (6 GHz), or 90 dB (13 GHz)
- Rear panel configurations are also available

With the use of Mini-Circuits' low cost Hand-Flex™ interconnect cables, multiple matrix configurations can be easily created by the user. The switches are controlled via USB or Ethernet, allowing control directly from a PC, or remotely over a network. Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments (both 32-bit and 64-bit systems).
