ZX75HP-65-S+

 50Ω 130 to 2000 MHz

The Big Deal

- Low insertion loss
- High rejection
- Connectorized package

Generic photo used for illustration purposes only CASE STYLE: KE1467

Product Overview

ZX75HP-65-S+ is a High pass filter in a rugged connectorized package covering 130 to 2000 MHz. This filter will find its application in TV Broadcast, point-to-point military radio and cordless telephones. It has repeatable performance across production lots and consistent performance across temperature.

Key Features

Feature	Advantages
Low insertion loss	Can be used in high performance applications.
Good rejection	This enables the filter to attenuate spurious signals and reject harmonics for broad band frequency.
Connectorized package	The connectorized package is easy to interface with other devices and well suited for test setups.

Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuits standard limited warrantly and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp

Features

• High rejection

Applications TV Broadcast

• Connectorized package

· Point-to-point military radio Cordless telephones

High Pass Filter

50O 130 to 2000 MHz

• Wide band, 130 MHz to 2000 MHz
