PRODUCT OVERVIEW

HFCN-2502+ is a miniature low temperature co-fired ceramic (LTCC) high pass filter with a 25 to 57 GHz passband supporting a variety of applications. This model provides 1.8 dB typical insertion loss over a wide band due to its rugged monolithic construction. Housed in a tiny 1206 ceramic form factor, the filter is ideal for dense signal chain PCB layouts where it complements MMIC size and performance. The LTCC fabrication process assures minimal RF performance variation while delivering a product that is well suited for environmental extremes of high humidity and temperature.

KEY FEATURES

Feature	Advantages
Ultra-wide passband	More than an octave bandwidth for wideband applications
Cost effective	LTCC is a scalable technology that is cost effective due to ease of production in high quantities.
Small size 1206	Allows for high layout density of circuit boards, while minimizing effects of parasites.
Surface Mountable	Suitable for very high volume automated assembly process.
