The Big Deal

- Low insertion loss
- Broader bandwidth
- High Rejection
- Miniature shielded package

Product Overview

The RBP-188+ is a broad band filter in a small shielded package (size of 0.35" x 0.35" x 0.10") fabricated using SMT technology. This filter offers outstanding close in rejection, low insertion loss for use in mobile networks and digital television.

Key Features

Feature	Advantages
High Rejection	RBP-188+ is enables the filter to attenuate spurious signals and rejects harmonics for broad band of frequency.
Low Passband VSWR	This filter maintains typical VSWR over passband frequency range making this filter easier to integrate into receiver and transmitter RF chains with less concerns for in band frequency ripple.
Small size, 0.35" x 0.35" x 0.10"	The unique surface mount package enables the RBP-188+ to be used in compact design.
