

## RF SPDT Switch Matrix RCM-6SPDT-18

DC to 18 GHz 500 **SMA** Female

#### THE BIG DEAL

- 6 x mechanical SPDT absorptive switches
- Ethernet & USB control
- High isolation, 85 dB typ

#### **APPLICATIONS**

- Benchtop and rack mounted automated test systems
- 5G FR1, WiFi 6E, UWB, Bluetooth
- Military radio, radar & electronic warfare
- Test & measurement systems
- Fail-safe / redundancy switching
- Switch matrices

methodologies and qualifications

#### **PRODUCT OVERVIEW**

Mini-Circuits' RCM-6SPDT-18 comprises six independently controlled, electro-mechanical SPDT switches. Each switch operates over a wide bandwidth, from DC to 18 GHz with high isolation (85 dB typical), low insertion loss (0.2 dB typical) and high input power rating. The switches are of a fail-safe and break-before-make-configuration, with a typical life time of 10 million switching cycles when used within the noted specifications.

The switch box is constructed in a compact, rugged metal case (8.25 x 8.25 x 4.25") with all SMA (f) RF connectors on the front panel. The switches are controlled via USB or Ethernet, allowing control directly from a PC, or remotely over a network. Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments (both 32-bit and 64-bit systems).

#### **KEY FEATURES**

| Feature                         | Advantages   |
|---------------------------------|--|
| Mechanical switches             | Mechanical absorptive switches provide high reliability, repeatable performance and internal termination of input signals on the disconnected paths  |
| Fail-safe design                | The switches revert to a known default state when the DC supply is removed, allowing their use in systems that must continue to operate safely in the event of power failure   |
| Break-before-make configuration | Prevents a momentary connection of the old and new signal paths, reducing the inconsistent transient effects that could otherwise be observed during switching   |
| USB & Ethernet control          | USB HID and Ethernet (HTTP / Telnet) interfaces provide easy compatibility with a wide range of software setups and programming environments   |
| Full software support           | User friendly Windows GUI (graphical user interface) allows manual control straight out of the box, while the comprehensive API (application programming interface) with examples and instructions allows easy automation in most programming environments |

- Mini-Circuits' full software and support package including user guide, Windows GUI, DLL files, programming manual and examples can be downloaded free of charge from: https://www.minicircuits.com/softwaredownload/ztm\_rcm.html
- Please contact testsolutions@minicircuits.com for support

#### **MINIMUM SYSTEM REQUIREMENTS:**

| Parameter    | Requirements                       |  |  |
|--------------|------------------------------------|--|--|
| Interface    | USB HID & Ethernet (HTTP & Telnet) |  |  |
|              | GUI                                | Windows 7 or later   |  |
| System       | USB API DLL                        | Windows 7 or later and programming environment with ActiveX or .NET support    |  |
| Requirements | USB Direct Programming             | Linux, Windows 7 or later  |  |
|              | Ethernet                           | Windows, Linux or Mac computer with a network port and Ethernet TCP/IP support |  |
| Hardware     | Intel i3 or equivalent             |  |  |

## APPLICATION PROGRAMMING INTERFACE (API) ETHERNET SUPPORT:

- Simple ASCII / SCPI command set for attenuator control
- Communication via HTTP or Telnet
- Supported by most common programming environment

#### **USB SUPPORT (WINDOWS):**

- ActiveX COM DLL file for creation of 32-bit programs
- .NET library DLL file for creation of 32 / 64-bit programs
- Supported by most common programming environments (refer to application note AN-49-001 for summary of suported environments)

#### **USB SUPPORT (LINUX):**

Direct USB programming using a series of USB interrupt codes

Full programming instructions and examples available for a wide range of programming environments / languages.

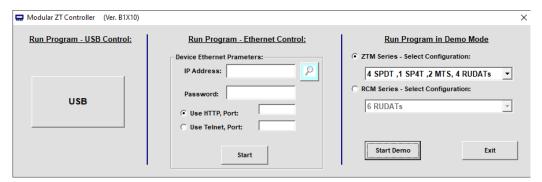

## RF SPDT Switch Matrix RCM-6SPDT-18

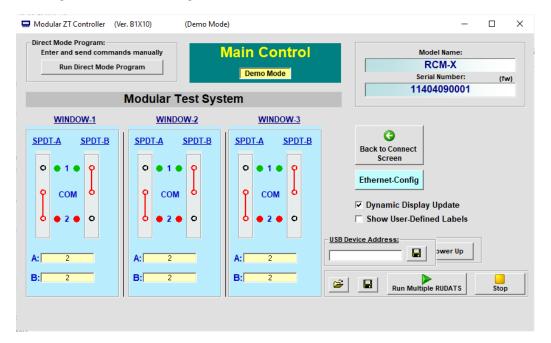

50Ω DC to 18 GHz SMA Female

#### **GRAPHICAL USER INTERFACE (GUI) FOR WINDOWS - KEY FEATURES**

- Connect via USB or Ethernet
- Run GUI in "demo mode" to evaluate software without a hardware connection

- View and set switch states at the click of a button
- Configure and run timed switching sequences
- · Set start-up switch state
- Configure Ethernet IP settings

## RF SPDT Switch Matrix RCM-6SPDT-18
