

*Wideband*

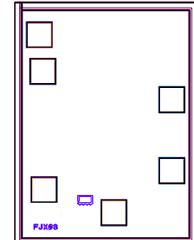

# Monolithic Amplifier Die

**TSY-172LNB-D+**

**50Ω    0.03 to 1.7 GHz**

## The Big Deal

- Very wideband, 30 MHz – 1.7 GHz
- Low NF over entire frequency band, 1.4 dB
- Low current and low voltage (2.7V and 7.7 mA)
- Internal bypass switching

## Product Overview

TSY-172LNB-D+ (RoHS compliant) is an advanced Low Voltage, Low Current, Low Noise wideband By-pass amplifier Die fabricated using GaAs E-PHEMT technology offering extremely high dynamic range over a broad frequency range. It has integrated switches enabling users to bypass the amplifier.

## Key Features

Feature	Advantages
Ultra-wideband: 30 MHz – 1.7 GHz	Ideal for a wide range of receiver applications including military, commercial wireless, and instrumentation.
Low Voltage & Low Current 2.7V & 7.7 mA	Ideal for Battery operated systems
High IP3 24.7 dBm typ at 1 GHz	Provides enhanced linearity over broad frequency range under high signal conditions.
Internal bypass switch feature draws 0.2 mA during Bypass	Prolongs battery life by switching to bypass mode
Unpackaged Die	Enables the user to integrate the amplifier directly into hybrids

# Monolithic Amplifier Die

**TSY-172LNB-D+**

**50Ω 0.03 to 1.7 GHz**

## Product Features

- Wideband: 0.03-1.7 GHz
- Built-in Bypass switching
- Low Noise figure: 1.4 dB typ.
- P1dB: +17.5 dBm typ.
- Low current and low voltage (2.7V and 7.7 mA)

### +RoHS Compliant

The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

## Typical Applications

## Assembly and Handling Procedure

1. Storage  
Dice should be stored in a dry nitrogen purged desiccators or equivalent.
2. ESD  
MMIC GaAs E-PHEMT amplifier dice are susceptible to electrostatic and mechanical damage. Die are supplied in antistatic protected material, which should be opened in clean room conditions at an appropriately grounded anti-static workstation. Devices need careful handling using correctly designed collets, vacuum pickup tips or sharp antistatic tweezers to deter ESD damage to dice.
3. Die Attach  
The die mounting surface must be clean and flat. Using conductive silver filled epoxy, recommended epoxies are DieMat DM6030HK-PT/H579 or Ablestik 84-1LMISR4. Apply sufficient epoxy to meet required epoxy bond line thickness, epoxy fillet height and epoxy coverage around total die periphery. Parts shall be cured in a nitrogen filled atmosphere per manufacturer's cure condition. It is recommended to use antistatic die pick up tools only.
4. Wire Bonding  
Bond pad openings in the surface passivation above the bond pads are provided to allow wire bonding to the dice gold bond pads. Thermosonic bonding is used with minimized ultrasonic content. Bond force, time, ultrasonic power and temperature are all critical parameters. Suggested wire is pure gold, 1 mil diameter. Bonds must be made from the bond pads on the die to the package or substrate. All bond wires should be kept as short as reasonable to minimize performance degradation due to undesirable series inductance.

\*Known Good Dice ("KGD") means that the dice in question have been subjected to Mini-Circuits DC test performance criteria and measurement instructions and that the parametric data of such dice fall within a predefined range. While DC testing is not definitive, it does help to provide a higher degree of confidence that dice are capable of meeting typical RF electrical parameters specified by Mini-Circuits.

## ESD Rating\*\*

Human Body Model (HBM): Class 1A (Pass 250V) in accordance with ANSI/ESD STM 5.1 - 2001

\*\* Tested in industry standard MCLP 2X2 mm, 8-lead package.

**Environmental Specifications****ENV80**

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-40° to 85° C or -40° to 105° C or -55° to 105° C Ambient Environment	Refer to Individual Model Data Sheet
Storage Environment	20° to 35° C and 40 to 60% humidity (In Factory Shipped Package)	Individual Model Data Sheet
