

Mini-Circuits

COAXIAL SOLID STATE

SP4T RF Switch

ZSW4-E673+

50Ω 10 MHz to 67 GHz Reflective

THE BIG DEAL

- Ultra wideband operation, 10 MHz to 67 GHz
- High Isolation, 45 dB
- Low VSWR, 1.4:1 typ. Across Operating Band
- All-OFF State Available
- Bi-directional

APPLICATIONS

- LTE & 5G MIMO Infrastructure
- Test & Measurement Equipment
- R&D, Production, and OTA Test Systems
- WiFi6E, IoT, UWB, and SATCOM
- Communications, Radar, EW, and ECM Defense Systems

Generic photo used for illustration purposes only

Model No.	ZSW4-E673+
Case Style	WV2820
Connectors	1.85mm-Female

+RoHS Compliant

The +Suffix identifies RoHS Compliance.
See our website for methodologies and qualifications

PRODUCT OVERVIEW

Mini-Circuits' ZSW4-E673+ is an SP4T reflective, solid-state switch with an internal driver. This switch is designed for wideband operation from 10 MHz to 67 GHz and supports many applications requiring high performance from 5G infrastructure to automated test equipment and various defense applications. The bidirectional switch provides excellent isolation, and high linearity. It operates on a positive +5.0V supply and utilizes standard 3.3V TTL logic. The switch comes housed in a compact, aluminum alloy case (1.48" x 1.39" x 0.71") with 1.85mm-female connectors at all RF ports and a 10-pin digital control snap connector for DC power and control signals.

KEY FEATURES

Feature	Advantages
Ultra Wideband, 10 MHz to 67GHz	One model can be used in many applications, ideal for wideband applications such as military and instrumentation.
Low VSWR, 1.4:1 across the entire band	Low VSWR across the entire band helps to improve system performance by reducing component interaction.
High Isolation, 45 dB Across Operating Band	High isolation significantly reduces leakage of power into OFF ports.

	Any ON port connected to RF-IN port	0.01 to 67	-	1.4	-	

1. See truth table on page 3 for list of states.

2. VSWR defined for RF-IN only at active state.

3. Switch is bi-directional

ABSOLUTE MAXIMUM RATINGS^{4,5}

Parameter	Ratings
Operating Temperature	-20°C to 85°C
Storage Temperature	-20°C to 85°C
Supply Voltage ⁶ (VDD)	+5.5V
Control Voltage (V1, V2, V3)	0V to +3.5V
RF Input Power (10 MHz – 1 GHz) ^{7,8}	+17 dBm
RF Input Power (1 GHz – 67 GHz) ^{7,8}	+27 dBm

4. Operation of this device above any of these conditions may cause permanent damage.

5. Operation in the range between the max operating power and the absolute maximum rating for extended periods of time may result in reduced life and reliability.

6. Do not apply DC voltage at any of the RF ports. In Application where DC voltage is present at either input or output port, coupling capacitors are required. For DC Block, please use Mini Circuits P/N. BLK-E653+

7. Applicable at any port.

8. Compression level not noted as it exceeds max safe operating power level

CONTROL CABLE

INCLUDED ACCESSORIES

CBL-5FT-MPD+ is a "Pigtail" connector included with every purchase of ZSW4-E673+. CBL-5FT-MPD+ is a shielded cable with stripped wires (#32AWG) on one end and a connector on the other designed to mate to the ZSW4-E673+. These bare wires enable the customer to assemble their own cable as required to interface with the ZSW4-E673+ (cable length is 4.9ft/ 1.5meters).

CBL-5FT-MPD+ WIRING INFORMATION

Typical Performance Curves

Outline Dimensions

WV2820

Weight: 70 grams

Dimensions are in inches (mm). Tolerances: 2 Pl. $\pm$.03[.76]; 3 Pl. $\pm$.015[0.38]

Notes:

Case material: Aluminum Alloy.
Case Finish: Gold Plated.

RF/IF MICROWAVE COMPONENTS

All Mini-Circuits products are manufactured under exacting quality assurance and control standards, and are capable of meeting published specifications after being subjected to any or all of the following physical and environmental test.

Specification	Test/Inspection Condition	Reference/Spec
Operating Temperature	-20° to +85°C Baseplate Temp	Individual Model data Sheet
Storage Temperature	-20°C to +85°C Ambient Environment	Individual Model Data Sheet
Thermal Shock	-20°C to +85°C 100 cycles	Transition time=5 mins, Dwell time = 30 mins
Vibration	Random Vibration (Non-operating)	MIL-STD-810F Method 514.5 Procedure I, Category 24, Figure 513C-17
Mechanical Shock	Non-operation	MIL-STD 810F Method 516.5 Procedure 1, Table 516.5-II
