Mini-Circuits

FEATURES

Wideband Coverage, DC to 18 GHz

50Ω

COAXIAL

Termination

DC to 18 GHz N-Type-Male

- 2 Watt Rating
- Rugged Construction
- Brass Body with Trimetal Finish

APPLICATIONS

- Cellular Communications
- Satellite Communications
- Defense communications
- Test Set-up

PRODUCT OVERVIEW

Mini-Circuits' KARN-50-18+ is a wideband 50Ω termination capable of absorbing signals up to 2W from DC to 18000 MHz. This model provides excellent return loss across its entire operating frequency range, effectively dissipating power with minimal signal reflection. The unit features and N-Male connector with rugged construction for a long life of use and comes in a Cu-Sn-Zn plated brass case.

KEY FEATURES

Features	Advantages	
Wideband, DC to 18 GHz	Extremely wide frequency range provides application flexibility and makes this model ideal for broadband and multi-band use.	
Good Return Loss, 18 dB min. up to 18 GHz	Good return loss minimizes signal reflections across multiple-decade frequency range	
Power handling	KARN-50-18+ meets a wide range of system power requirements	
Wide operating temperature range, -55 to +100 °C	Withstands tough operating conditions and is suitable for use near high power componentry where heat rise is common
