

Product Overview

ZT-252 is an example of Mini-Circuits' ZTM2 Series modular switch platform, with flexible front panel component options which can be customized to suit any test applications. ZT-252 is configured with:

- 5 x mechanical SP6T switches, DC-12 GHz
- 6 x mechanical SPDT switches, DC-18 GHz
- 4 x passive 2-way splitter / combiners, 350-6000 MHz

Each switch is of a high reliability, fail-safe design, operating across the bandwidth with low loss and high isolation. This model is housed in a compact 5U height, 19-inch rack chassis with SMA RF connectors on the front panel.

The system can be controlled via USB or Ethernet (supporting both HTTP and Telnet network protocols). Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments (both 32-bit and 64-bit systems).
