Product Overview

ZTM2-12SP4T-18 is part of Mini-Circuits' ZTM2 series modular switch range, which offers flexibility and fast turnaround for automated test setups. The design consists of a 19" rack chassis (5U height) which can be populated with your choice of mechanical switches on the front panel, with options up to SP8T and 40 GHz.

With the use of Mini-Circuits' low cost Hand-Flex™ interconnect cables, multiple matrix configurations can be easily created by the user. The switches are controlled via USB or Ethernet, allowing control directly from a PC, or remotely over a network. Full software support is provided, including our user-friendly GUI application for Windows and a full API with programming instructions for Windows and Linux environments (both 32-bit and 64-bit systems).
