

Coaxial-Ceramic Resonator Filters and Multiplexers

50Ω

DC to 6 GHz

The Big Deal

- Low insertion loss with excellent power handling
- Passbands up to 6 GHz
- Fractional bandwidth from <1 to 25%
- Excellent temperature stability
- Rugged construction to handle demanding environmental conditions

Product Overview

Mini-Circuits' *Coaxial-Ceramic Resonator filters* offer low insertion loss in very small form factors, using ceramic material with high dielectric constant and superior Q factor. Bandpass and bandstop filters, diplexer and multiplexer designs can be constructed using this technology. Low insertion loss combined with excellent power handling makes these filters well suited for transmitter and receiver signal chains. Advanced filter design and construction can achieve stopband width greater than 3x the center frequency

All our coaxial-ceramic resonator filters are built with rugged construction, qualified to withstand multiple demanding reflow cycles. Custom integrated assembly with LNA greatly simplifying system integration. They can be realized in small form factors with high-quality, precise machining for applications where size is critical. Excellent repeatability across units is achieved through precise tuning and process control.

Key Features

| Feature | Advantages |
|--------------------------|---|
| Low insertion loss | Low signal loss results in better SNR in signal chain |
| Fast roll-off | Higher selectivity results in better adjacent channel rejection and dynamic range |
| Wide stop band | Wide spur-free stopband results in better receiver sensitivity |
| Excellent power handling | Well suited for transmitter applications |
| Rugged Construction | These filter assemblies have been qualified over a wide range of thermal, mechanical and environmental conditions including withstanding the stress of extensive solder reflow cycles |
| Small Size | Very well suited for high performance applications where size is a constraint. |
| Temperature stability | Very minimal change in electrical performance across temperature makes these filters suitable for a wide range of operating conditions. |

Bandpass Filter

ZX75BP-915-S+

50Ω 902.5 to 927.5 MHz

Generic photo used for illustration purposes only

CASE STYLE: HY1238
Connectors Model
SMA-MF ZX75BP-915-S+

Features

- Narrow bandwidth
- Excellent rejection
- High selectivity
- High power handling
- Connectorized package

Applications

- Industrial, Scientific and medical (ISM)
- Amateur radio
- Private and public land mobile
- Field disturbance sensors
